

THE KENYA SCOUTS ASSOCIATION

PRELIMINARY TRAINING COURSE RESOURCE MATERIAL

INTRODUCTION

This Training module is designed to help leaders who have completed introductory training course and are working with a scout group or those who have not had any training yet they are working with scout units. Through discussions and doing it practically, it aims at assisting the Scout leaders to pass over scouting principles and practice to young people of scout age range as exciting and adventurous activity. It also provides an understanding of the adults' role in the scout section leadership and to acquire a range of basic scouting skills for immediate use in the unit programme.

Ideally, Basic level training aims at answering the question: □ How is Scouting conducted? □

A number of assignments, exercises, practical work/ involvement and demonstrations are very critical and should be carried out during the course as part of weekly unit programme.

Purpose of Unit Leader training

- The overall purpose of unit leader training is to develop unit leaders who are skilled working effectively with youth and other adults in Scouting
- Unit leaders training therefore aims to develop in the unit leader
 - An understanding of the background, principles, structure and spirit of Scouting
 - An understanding of the needs of young people within the specific environment in which the leader and youth will be working
 - An ability to use the methods and skills of scouting to meet the needs of young people
 - The personnel leadership skills to work positively and constructively with young people and other adults
 - The personal management skills to plan for, implement, administer and evaluate a programme, which will contribute to the personal growth of young people

Course objectives

At the end of the course the participants should be able to:

- Discuss the role and responsibilities of adults working with a scout unit.
- Explain the function of the patrol system in the operation of scouting method
- Describe methods of training patrol leaders and working with them through the Patrol leader's council to plan effective programmes.
- Perform technical skills required for activities within the scout standard and demonstrate simple instructional methods.
- Describe the working relationships with the National organization, the local organization, and Scouters from other sections of the Scout movement;
- Describe the characteristics and needs of boy/girls in the 6 to 11, 12 to 15, 16 to 18 and 19 to 30 years age range and the methods of meeting their needs through scouting
- Plan their own programmes to cover various activities related to the sections e.g. camps, troop meeting programmes, camp fire, community services, expeditions and tours.
- Explain how one can further training through the scout leaders' training scheme and state resources and support available to meet the training.
- Describe how the unit is administered through unit records, fund raising and working using committees.
- Communicate effectively and be able to relate well with other people/ organizations.
- Describe the outdoor activities and describe how to organize them using the scout method.
- Instruct others on simple First Aid.
- Be able to conduct scout ceremonies e.g. Investiture and going up ceremony. Conduct games and songs played in Scouting
- Be able to instruct on map reading and use of compass.
- Be able to conduct Scout Own - worship in scouting;
- Relate scouting to the community by doing such things as in conservation, immunization and road safety.

Recognition/Certification

Trainees who successfully undertake the Preliminary training level will be recognized by the National Training Committee and awarded a merit certificate as soon as possible. Before undertaking the advanced course part III □ the Camp phase, the Scout leader will have to complete a compulsory training study/ theory questions. This should be

given out to participants immediately after this course. The participants will be expected to carry the completed study paper to the Camp phase venue for discussion on possible areas of difficulty with fellow participants and even trainers. Remember this is not an examination but an opportunity for the candidate to do research for greater insight towards better understanding of the Purpose, Principles and Practice of Scouting.

MODULE 1: UNIT ORGANIZATION & ADMINISTRATION

Objectives:

By the end of the module the learner should be able to:

- Describe the different types of Scout units
- Set-up a Scout unit

Standard requirements of setting up a Scout unit

1. Consult the Head of the institution about starting a scout unit and explain what they would be doing for the institution and the community □ benefits of scouting i.e. first aid, flag raising, community services etc. Ask the head to be the sponsor.
2. Prepare yourself - It is necessary for a unit leader to have special Scouting training if they are to become a good leader. Talk to the recruits, encouraging them to join the movement; talk well about scouting by explaining that its adventure and fun. Recruit the interested members and put down their names.
3. Inform the parents of the interested members through a letter for permission. Tell them that the scout will require some support from the for instance registration fee, uniform etc
4. Contact the local scout authorities for information on registration of the scouts whose parents have acknowledged the request in writing. Fill the following forms:
 - Form R for the scout □ s registration and list the names the fee paid, age, gender and so on for membership card to be issued to the scouts.
 - Form W for the Scout leader □ to be issued with a warrant to officially runs the unit and a membership card to be issued. Register the unit/institution also with KSA. Once and a certificate of registration shall be awarded.Remember the registration is renewed annually at the same rates.
5. Start training of the scouts with a small group of 6-8 scouts past the first stage in each section notably the pre investiture stage. Recruit more scouts of about 18 and make the first 8 to be Patrol leaders and the assistants of 4 patrols of 8 scouts each.
6. Recruit an assistant
7. Establish the parents of the scouts committee, which will help in the running of the unit. This should include the head teacher, some interested teachers/ colleagues and the Scout leader as the secretary to the committee. Recruit one of them as the assistant scout leader.
8. Initiate a **Court of Honour/ Patrol leaders council**. This committee is composed of the patrol leaders and their assistants to draw the programme of activities to be undertaken and to budget. The Scout leader may attend the meetings as an advisor only.
9. Have specific meeting days at a specific place and time to organize and plan each day in advance.
10. Carry out an investiture for those who have passed the pre-investiture to admit them to the worldwide fraternity of scouting

Patrol formation/arrangement

- Patrol Leader {PL} □ No 1 stands on extreme right of the patrol
- Assistant Patrol Leader {APL} □ No. 2 stands on the left of the Patrol
- A Patrol has 6-8 members given numbers 1,2,3, 4,5,6,7,8 when standing on a parade, the arrangement of the Patrol takes the order below:

LEFT 2 8 7 6 5 4 3 1 RIGHT

- If the Patrol Leader is to leave the Patrol, the responsibility is taken by the APL and the new order is as below until the Patrol Leader is back

LEFT 3 8 7 6 5 4 2 RIGHT

How to Run a Scout Unit

The application of the Scout Method should be visible in a Scout Unit. This can be achieved if the following is put in place:

- Regular troop meetings
- Spearhead troop programme
- Emphasize on the Scout's personal progression
- The Scout Leader enhances his/her competence by training

a) Unit/patrol equipment

- Section programme books
- Leader's handbook
- Essentials of first aid
- National flag/ Scout flag
- Map of the area
- Whistles
- Ropes
- Twines
- First aid box
- Compass
- Progressive cards/ progressive chart
- Scout uniform & badges
- Scouting for boys

b) Unit finances/ Fundraising

Sources:

1. Termly contributions
2. Projects
 - a. Vegetables growing
 - b. Poultry keeping
 - c. Bee keeping
 - d. Rabbit keeping
 - e. Tree planting
 - f. Fish farming {where applicable}
3. Old tins & plastic shoes selling
4. Scouts job week
5. Video shows
6. Sponsored walks
7. Planned occasions- invite parents & organize an impromptu harambee
8. Donations □ know where and how to get money from the public, government departments businessmen, service clubs, i.e. Lions Rotary, Foundations i.e. Jomo Kenyatta, Kalonzo, Labor unions.

c) Unit Records

The Scout Leader should keep all the relevant records like troop meetings, attendance, registrations, progressive scheme, awards and honours, inventory among others. These records are important for reference and proper troop management.

The Scout Leader should also play a big role in ensuring co-operation between the Scout parents, the sponsoring authority and the rest.

Scout ceremonies like the investiture and awards ceremonies should bring together all the stakeholders.

Why records?

- To monitor the progress of the unit, scout leader or the sponsoring authority.
- To make references
- To help in the future planning
- For handing over and taking over purposes.

Record to keep include:

- Log book- to record daily activities
- Visitors book □ to be signed by visitors
- Inventory □ to record the equipment and facilities of the unit.
- Court of Honour minute book
- Correspondence file □ letters received and dispatched
- Progress record book/ file
- Attendance register
- Photo album
- Admission book/ file
- Community service/ development record book
- Cash book
- Receipt books

D) PATROL SYSTEM

Is a method, which the Scout training & activities rest on. Is a unique and dynamic method by which a Scout unit operates through small groups/patrols.

Operations of the Patrol Systems

- The Scout Leader trains the patrol leaders thoroughly well
- The patrol leaders, in turn using the knowledge and skills gained to train their scouts in their patrols during patrol meetings
- Each patrol guarantees their members safety, security and opportunities to explore, discover and want to know.

Importance of Patrol System

- Gives an opportunity to lead and to be led by the peers
- Opportunity to develop socially and learn how to relate and work with others at the unit and in their families
- Makes it easy to run unit activities and gives the Scouts opportunity to participate in running unit activities
- To learn how to think and make plans for others {decision making}
- To learn to take responsibilities
- To learn how to organize effectively
- To gain leadership qualities
- Provides security to members/ guarantees safety to members
- Overcomes inhibition in members
- Helps cultivate and build team spirit and fraternity among Scouts.

Characteristics of a Patrol system

- A patrol is a group of 6-8 scouts
- Each Patrol must have a Patrol badge, flag, APL and name
- Each Patrol must have Patrol records kept by the Patrol Scribe
- Team spirit and brotherhood must be cultivated in the Patrol
- Each member of the Patrol should have a specific role to play e.g.
- Patrol Leader (Overall leader)
- Assistant Patrol Leader (Second in leadership)
- Patrol Grub Master
- Patrol Den Keeper

- Patrol Librarian
- Patrol Cheer Leader
- Patrol Hike Leader
- Scribe
- Patrol Record Keeper
- Patrol First Aider
- Patrol Gear Master
- Patrol Treasurer
- Patrol Public Relations & Information

Functions/ roles

a.) Patrol Leader

Within a unit, a Patrol Leader performs the following tasks:

1. Commands the Patrol
2. Represent the Patrol in C.O.H
3. Locate duties to other members
4. Leads Patrols during Patrol activities
5. Trains members of the Patrol
6. Introduce new ideas to their Patrol members
7. Performs duties assigned by C.O.H and Scout Leader
8. Keeps Patrol records
9. Presents Scout for investiture

A good Patrol Leader is one who is:

- Brave and courageous
- Understanding,
- Friendly and sympathetic
- Knowledgeable and creative
- Responsible
- Obedient to the Court of Honour and to the Scout Leader
- Firm, fair and flexible in decision-making

b.) Assistant patrol leader

- Assists the Patrol leader in day-to-day activities of the administration of the unit
- However, s/he may have specific duties as assigned by the Patrol leader.

c.)Patrol grub master

- Oversees the condition of the dry and wet pits
- Organizes food and rations
- Determines the menu for a camp hike
- Buys and stores the food
- Keeps records of food use

d.)Patrol den keeper

- In charge of Patrol Corner or den
- Selects any areas to be used by the Patrol
- Makes sure the area used by the Patrol for camping is left in better condition than how the Patrol found it

e) Patrol librarian

- Ensures the safety of Patrol books
- Keeps a record of the library including receipts of books, issuing of books, and dates of return, etc.
- Assists in gathering information materials for the Patrol
- Keeps a conducive atmosphere within the library, especially during the camp

f) Patrol cheer master

- Acts as Patrol cheerleader
- Acts as campfire leader
- Acts as spirit person

g) Hike master/camp master

- Plans and organizes hikes and camps
- Helps in map-reading
- Makes the maps and compasses for the Patrol Gear Master
- Maintains Patrol equipment, including camping gear

h) Scribe

- Keeps Patrol log book and albums
- Keeps records of Patrol in council
- Produces Patrol newsletter

i) Patrol record keeper

- Looks after attendance register and address book
- Keeps records of equipment for the Patrol
- Keeps all other records as instructed by Patrol leader

j) Patrol first aider

- Trained/expert in first aid
- Looks after the first aid equipment
- Keeps records of all first aid applied in the course of Scouting

k) Patrol treasurer

- Looks after funds
- Keeps the cash book, receipts
- Prepares the budget for proposed activities

i) Patrol public relations and information

- Responsible for Patrol communications, notices and reminders
- Keeps the Patrol 'information board' up-to-date
- Takes and posts photographs
- Acts as a reporter in conjunction with the Patrol Scribe

Note: These are just suggestions.

Actual duties may differ depending on the circumstances.

Programme Planning

The troop should aim at having an attractive, comprehensive and appealing programme. The programme can be classified as short term, medium term or long term. Short-term programme includes troop meetings and ceremonies. There has to be a procedure in all troop meetings. For the smooth conducting of the troop meetings, there should be a patrol on duty to conduct the affairs of the meeting. An example of a medium term programme might involve activities to be covered on a quarterly basis while a long-term programme involves activities to be covered on an annual basis and above and might include troop projects. It is important to note that the troop programme should be based on the Scouts' interests and needs and not the Scout Leader's.

Progressive Scheme

This educational component of the Scout's development should be stimulating and consistent. Bits of this should be covered in the troop meeting. The Scout Leader should have progressive records of each Scout and encourage them to pursue both standard and proficiency badges in their sections.

2. Have a plan for meeting in advance
3. The meeting should be exciting and the Scouts should learn at least a new item in every meeting

Unit meeting activities

During the unit meeting, participants should know the importance of specific activities such as:

- Prayers - Expression of thanks to God and placing of our requests.
- Inspection - Maintaining good order and discipline.
- Patrol activities - For teaching new items and developing team spirit
- Patrol dens - Corners for Patrol meeting in Patrols
- Unit formation - Standing order in Patrols when called.

Preparation

The Scout Leader conducting the meeting should prepare the lesson to be learned in advance and obtain all the necessary equipment and materials to support the lesson

Participation

The Scout leader should make the meeting lively and motivating by involving all Scouts.

Duration

The meeting should last between one hour and 1 1/2 hours.

Functions of patrol on duty

During the period of training, duty allocation for Patrols should rotate so that each gets a chance to organize others. The duties of Patrols should be agreed upon during the Court of Honour and these may include:

Unit activities such as flag break, inspection, prayers.

- Assembling the unit before activities start
- Dismissing the unit after activities
- Chairing sessions and making reports
- Assigning a participant to move a 'vote of thanks' to visiting speakers

Unit meeting programme

The programme has these key elements:

- Assembling
- Inspection
- Flag break and prayers
- Announcements
- Games
- Patrol activities (Patrol Leaders lead their Patrols in their den to learn chosen topics)
- A lesson by the Scout Leader
- Assembling
- Prayers
- Lowering of the flag

The Scout Leader conducting the meeting should put emphasis on the Patrol system and activities during the meeting

Scouts should display general knowledge of

- The importance of the weekly unit meeting
- The role of Patrol Leaders in the unit meeting
- The role of Scouts in the unit meeting
- The procedure of the unit meeting
- Importance of smartness, good order and discipline during the unit meeting

Maintaining good order

- A high standard of discipline, punctuality and good order is to be maintained at all times during the training.

- Inspection and flag breaking should be formal and smartly carried out
- Each activity should start and finish on time as scheduled.

Commands and signals

A Patrol Leader often has a whistle attached to a lanyard or cord. The following commands and signals should be memorized, so that they can use them effectively during Scout activities:

Words of command

- "Fall in" (get in line).
- "Alert" or "Attention" (stand up smartly).
- "Easy" or "At ease" (stand at ease).
- "Sit easy" or "Sit at ease" (sit or lie down without leaving the ranks).
- "Dismiss" □ disperse for good possibly until the following day
- Break off- -disperse for a while the you return
- "Right turn" or "left turn" (each Scout turns accordingly).
- "Patrol right turn" or "Patrol left turn" (each Patrol with its Scouts turns in unison).
- "Quick march" (walk smartly, stepping off on left foot).
- "Double" or "On the double" (run at smart pace, arms hanging loose).
- "Scout pace" (walk so many paces and jog so many paces alternately -- about 50 of each).
- Dress up □ is a spacing command. Each scout lifts the right arm to the shoulder of the member on the right parallel to the ground
- Drop □ a command to leave the position of dress up
- **About turn □ is half (180 degrees) turn to the right**

Whistle signals

When a Scout Leader wants to call the unit together, he whistles the 'Scout's Call: or uses a special ' unit Call.' This enables the Patrol to move/act quickly.

Here are some whistle signals for Scout field games:

- One long blast means "silence," "alert," "look out for the next signal."
- A succession of long, slow blasts means "go out, □ get farther away," or "advance," "extend:" "Scatter
- A succession of short, sharp blasts means, "rally:" "close in," "come together/" "fall in." The troop should, fall into an organized formation. The troop should practice this until they can be done silently and quickly. Scouts should move" on the double." Note that the Patrol Leader is always on the right of the Patrol and the Assistant Patrol Leader is on the left, with the remainder of the Scouts in Patrol order between them
- A succession of short and long blasts alternately means "alarm," "look out," "be ready," "man your alarm posts."
- Three short blasts followed by one long one from Scout Leader calls up the Patrol Leaders - i.e. □ Patrol Leaders come here."

Any signal must be instantly obeyed as fast as you can run - no matter what other job you may be doing at the time.

Hand signals

- Hand waved several times across the face from side to side, or flag waved horizontally from side to side opposite the face, means "no," "never mind," "as you were."
- Hand or flag held high, and waved very slowly from side to side, at full extent of arm, means extend, □ go farther out," "scatter."
- Hand or flag held high, and waved quickly from side to side at full extent of arm means "close in," rally/" "come here.
- Hand or flag pointing in any direction means "go in that direction."
- Clenched hand or flag jumped rapidly up and down several times means "run."
- Hand or flag held straight up overhead means "stop" "halt."

When a leader is commanding an order or message to a Scout who is some way off, the Scout (if he can hear what is

being said) should hold up his/her hand level with his head all the time. If he/she cannot hear, he should stand still, making no sign. The leader will then repeat louder or beckon to the Scout to come nearer. You may make up your own signals for other commands to your Patrol.

NB In addition to the signals listed above, your Patrol can make up its own signals for other commands.

EXERCISE

1. How do you form a Scout Unit?
2. Describe the ways in which you would train your patrol leaders Patrol leaders' council. "Court of Honour" is very important explain how it works and its importance
3. Organize an investiture or going up ceremonies for your troop

MODULE 2. SMARTNESS, DISCIPLINE AND GOOD ORDER

Discipline which culminates into manners, we say manners makes a man. And therefore we can see that discipline will also inherit smartness. When one is smart and wearing correctly, he has a high level of discipline.

It is also correct to say, one has some good order in whatever he/she does, because these three words □ smartness, discipline and good order are one and the same thing in a way.

a) SMARTNESS- Is simply cleanliness and neatness

Smartness can be seen and explained in the following expressions: -

- **Good organization:** Seen in whatever you do as you do it smartly and in an organized manner.
- **Good administration:** All the things that a group unit does follow at foot pattern as ordered by the leaders □ all activities flow well and smoothly.
- **Administration:** When one is smart, others look at him/her with a liking. They admire the person and even give him praise and talk of him well.
- **Attract interest:** People will be interested in smart things and despise shaggy systems.
- **Good impression:** Smartness creates good impression in the minds of those who see you or see anything smart and things that one does smartly.
- **Cleanliness:** Smartness is a sign of being clean and tidy.
- **Uniformity:** is smartness and depicts a good-looking Scouter or scout as is in good impression and admiration..
- **Correct wear of uniform:** Putting on your uniform correctly □ you will automatically be smart. Others would like to be associated with you.

Examples of Smartness

- Scout parades
- Wedding ceremonies
- Marching
- Admirable soccer team/athletes
- Well organized dances

Smartness needs the following:

- Correct decorations and patches □ badges and plumes
- Proper uniform i.e. scarf, berets

b) DISCIPLINE

Definition

Is a code of conduct based on the Scout Law Promise. It must be voluntary, personal and individual. In scouting, its loyalty, following commands and obedience that are ingredients of discipline. It is therefore a prerequisite to good order.

Common features of discipline:

- **Time management:** This is used very well as time is not being wasted in discipline and other things, achieving law No.9.
- **Maintain good behavior:** Scouts and their leaders are well behaved and therefore activities and intentions flow smoothly.

- **Obedience**- Disciplined unit with all stakeholders disciplined □ obedience is achieved and is automatic in it. All order and rules are obeyed without coercion or pressure achieving law No.7
- **Respect**: All the scouts and those in the unit or troops have a lot of respect for each other. This makes a clear understanding of law No 2 and 5.
- **Positive response** ie reporting on time
- **Controlled activities and noise**
- **Working in patrols** □ scouting spirit
- **Following the routine**

Golden Rules

Whether you have an agreed set of standards or not there are certain golden rules, which can help you.

- **Praise commitment to discipline** - if you want standards to remain constant and improve it is far more important to praise the 99% who conform rather than penalize the 1 %. Praise publicly, generally and often. Do not set individuals up as role models because they can easily become despised
- **Be consistent and constant** - Scouts need to be treated equally and fairly. Applying the same standard each time will also help you avoid letting any 'first offender' or a favorite Scout off (and we all have them) or over-penalizing a 'constant offender'. All your leadership must also be consistent and constant to the same standards.
- **Explain and justify yourself** - just because you □ say so □ is not enough. You would not unquestioningly follow orders from your district commissioner and neither should you expect a Scout to simply obey you.. You may find occasionally that you cannot justify an instant decision and have stopped something merely because you did not approve, rather than for any real reason. In such a situation be big enough to climb down. It will show you are human and earn you respect for the future
- **Put your standards in order** - if you seem to be facing a whole range of problems, tackle them one by one. If standards have been poor for a long time, a short while longer for the less important ones will not hurt.
- **Set an example** - easy to say and difficult to do. Examine yourself against the code. Ask yourself, would the way you have dealt with a situation have been acceptable if a patrol leader had done it that way?

Unacceptable Behaviour from Individuals

You will, from time to time, come up against unacceptable behaviour, which requires more than a swift reprimand. You do, however, have to be careful in judging unacceptable behaviour because you can sometimes unfairly label a Scout. A Scout who is hyperactive, perhaps, or highly intelligent and therefore, easily bored or who is, perhaps, slow to learn can easily be labeled a 'problem'. The outward signs or their behaviour are unacceptable when, in fact, the fault lies with what is offered to that Scout. Such problems are yours and not the individual's. In such situations devise ways of giving individuals support and seek advice from the parents who will often provide a solution from their own experience.

c) GOOD ORDER:

Orderliness shows a lot of discipline and smartness. It gives you a sense of attraction where others are attracted and wished to be associated with the good things they see in scouting. For example

- **Good Organization:** Scouts are known for advocating of good organization □ their activities are well organized such that they don't waste and are prompt in whatever they do. Their structures are simple and easy to follow. Good chain of command.
- **Arrangements:** You will be happy and pleased in seeing good arrangements in whatever you or others do. Scouts arrange their campsites and gargets orderly. This is what you see in □ allocation of areas, like kitchen, tents, shoe racks, firewood places, project corners, paths, play areas, the gates and parade areas. This is all good order.
- **Good order avoids confusion:** When there is no order, confusion reigns. This is noted well in daily programmes, parades, meetings, campfires, when good timetabling is not done. Scouts try to avoid the above by being disorderly.
- **Orders are easily accepted and obeyed when a good system is followed:** Scouts will know where the order comes from and when to answer to them and how to answer.
- **Authority recognition:** When order is seen to operate and is being adhered to the subjects will recognize the authority because proper structure and chain of command is used.
- **Attentiveness to orders:** Since there will be only one source of orders, attention will be given and adhere to signals and signals will be followed.

Characteristics of good order in a unit

- Troop records
- Dances
- Singing
- Sitting arrangements
- Standing order
- Self organization
- Yells
- Camping gear
- Parking of First aid kit
- Movement

All in all then people would like to be associated and be part of a smart, disciplined and orderly organization. Smartness is essential for discipline and good order, which will improve the interest in the boys and girls. So its smartness discipline and good order that will help publicize scouting.

Exercises

1. Describe the importance of discipline and control in Scouting.
2. Explain the various types of unacceptable behaviour that can comprise group cohesion.

MODULE 3. SCOUT CEREMONIES

Examples of ceremonies

- Investiture
- Going up ceremony
- Flag ceremony
- Scouts own
- Guard of honour/ March passes
- Camp fires
- Flag raising
- Rallies
- National celebrations
- Installation of office bearers

All ceremonies should be planned and organized in advance and should have a specific purpose.

a) Investiture

One only becomes a scout after being invested as a scout. The scout should pass the pre-investiture test for the relevant section. A scout is also not allowed to put on the scout badges before investiture. Leaders who have been invested nor done PTC are not allowed investing the scouts.

It is a ceremony where the young Scout is admitted into the worldwide fraternity of the Scout Movement.

The necessary items for investiture are:

- Kenya emblem
- World badge
- National flag

b) Going up ceremony

The Sungura Scout who has passed the Link badge graduates to the Chipukizi Scout unit section.

A Group Scout Leader or the Area Commissioner in the presence of the Sungura Scout Leader and the Chipukizi Scout Leader, their assistants and members of the Group Scout Council, will conduct this ceremony.

Procedure

The Scouts make two horseshoe formations, one composed of Sungura Scouts and one composed of Chipukizi Scouts facing each other with a line between them. The Sixer brings the Scout to be promoted to the middle of the two circles and explains to the patrol leader of the Chipukizi unit the position of the new Scout is welcomed by the Patrol Leader of the Chipukizi unit by left-hand shake and crosses the line, the Chipukizi Scouts will make yells and other signs of welcome and the Patrol Leader will lead him/her to his/her new patrol.

c) Camp fire

1. A campfire is an excellent test of the discipline of the troop. While the atmosphere should be friendly and informal, the boys/girls are expected to behave as Scouts and such things as ragging and talking during items should not be tolerated.
2. The atmosphere of a good campfire is naturally the right one for a good yarn by the Scout leader. The old pioneers, as they sat round their campfire sipped yarns and discussed the incidents of the day. It will often be possible to secure a visiting speaker to give a yarn.
 - Campfires are opportunities for introducing songs of some musical value; especially the old traditional folk songs should be sung, not yelled. Scouts' instincts to yell at the top of their voices can be satisfied by giving them yells now and again. Any occasional tendency to vulgarity, in the words of songs or sketches must be firmly dealt with at once. Hymn tunes used, as the setting for comic words are also to be discouraged.
 - Campfires are an integral part of scouting experience. Campfires involve a night of singing, story telling and play-acting around a fire.

At the end of a long day's work, Scouts gather around a fire to relax, share experiences and learn from older Scouts. Campfire is the climax of camping and a very memorable moment.

To have a successful campfire:

- The Scout Leader should use short items like songs, riddles, yells and tongue twisters during the process of facilitation in order to add variety to the learning. These will add fun and make sessions more interesting.
- The campfire should be prepared in advance
- The Scout Leader should inform all those involved of the role they will play or what they are expected to present/perform.
- The Scout Leader should encourage Scouts to come up with songs, yells, plays, poems, and stories etc.
- The campfire should last no longer than one to 1-1/2 hours.
- There should be a planned campfire programme. Activities should flow in a sequential manner.
- Activities should be short, clear and interesting.
- Activities should involve all members.
- Scouts are not allowed to perform plays/actions that involve fire or dangerous items.
- Scouts should be discouraged from abusive, shameful topics/items that do not depict Scouting.
- Building Campfire - Trainer to show by example.

Blanket or Campfire Jacket

Scouts are awarded various badges in this programme. Friends from other countries may give badges as a gift or souvenir. Scouts also attend Jamborees and are awarded meritorious or participatory badges. These badges can be mounted on a blanket for preservation as souvenirs.

Why a Campfire?

B-P's original idea of a campfire was simply a group of Scouts meeting together in a camp at the end of a busy day discussing their achievements during the day and making plans for the following day.

Whether it is song, acting or other activity, what is most important is not quality, it is not the enjoyment of those who hear it or see it. Rather the real virtue is the effort a Scout has made, the self-consciousness, which has been overcome, and the sense of achievement when they sit down to a rousing yell from the rest of the participants. A campfire is more than just a gathering of people around a fire. Rather than being just an isolated event, a campfire becomes an integral part of Scouting in helping boys and girls develop into the men and women we want them to become.

- It instills discipline of the troop
- It should be in a free and friendly atmosphere
- Provides enjoyment
- Camp fires are opportunities for introducing songs of some musical value
- Helps in creativity e.g. new games, stunts, yells & songs
- Used to Passing messages
- Revising/reinforcing lessons learned
- For Relaxation

- For Motivation

2.2.4 The Fire

It is important to remember that the fire will serve as the focal point for your campfire and particular care must be paid to the planning and laying of the fire.

The fire should be designed to provide warmth to the participants, but is equally important to ensure that the intensity of the heat will not develop to a point where participants are forced to vacate their spot on the log to retreat to a more safe distance.

2.2.5 The Campfire Chief

The campfire Chief is responsible for the campfire programme. It is important that the Scout Leader be ready with a well-planned programme. S/he will normally arrange with others to be involved in leading various parts of the programme. S/he is involved in the opening and closing ceremony of the campfire. The campfire participants should always hold him in respect.

Anyone can be a campfire chief; all it takes is a bit of imagination, good planning and confidence.

2.2.6 The Setting

It is important to consider the location of a campfire circle. Try to make it a special spot, a way from the more lived-in areas of your camp. Make it a spot people will be drawn to.

If it is a spot, which you will use more often, then you will want to take the time to make it something very special.

Careful attention can be paid to comfortable seating and you may want to develop special seating arrangements for the campfire chief, special guests and, possibly other leaders.

2.2.7 Duration and Pace

Duration, pace, content and style are some of the considerations which you will have to attend to long before the first song is sung.

The duration of the program is largely determined by the nature and age of the participants.

The pace has often been described as a mirror image of the fire itself, rising quickly to a pick-out of bright activity and then gradually diminishing, as do the flames, becoming like a glow given off by the firewood.

An Example of a campfire ceremony

1. Opening
2. Welcoming song
3. Action song
4. Yell
5. Skit
6. Yell
7. Lively or action songs
8. Round
9. Game or skit
10. Yell
11. General Song
12. Presentation (if any)
13. General Song
14. Quiet song
15. Spiritual activity
16. Prayer
17. Closing

Campfire leaders

A camp fire leader must possess:-

1. Sympathy
2. Intelligence
3. Unselfishness
4. Tolerance
5. Good singing voice
6. Friendliness

7. Firmness
8. Patience
9. Humility

He must be prepared to devote a fair amount of time to learning by heart

Opening

Words used in the opening of campfire: -

Brothers/sisters from the North & South

Brothers/sisters from the East & West

As the flames go upward so go our aims.

As the red log glows so may the Scout ideals warm the world.

As the red log goes down let our misdeeds go down.

May good luck come to you Scout

I now declare the campfire officially opened.

Then all sing

Campfire is burning (sing twice) Draw nearer (sing twice)

Fire fire (sing twice)

Come sing and be merry.

Whatever opening words the leader may use, will at the end say, □ Scouts, the Camp fire is open□

Procedure:

The 10th law

Always consider the 10th Scout law for the theme of any yell or song that a patrol gives. It is a rather more serious matter if an offensive song or yell meets with approval, cheers and laughter.

Solutions:

1. A talk with the patrols before hand is necessary
2. A re-orientation of the Scouts own:
 - a. Here, reading and prayers will be chosen on the theme of the 10th Scout law and in the Scouters
□ talk□ will make these points:-
 - b. We must carry the 10th Scout law into every part of our lives
 - c. A regrettable sketch/ song was presented at the campfire. The patrol concerned broke the 10th law but so did all those of you who cheered and approved. Approval of evil is often worse than evil itself.
3. There should be no question of forcing anyone to take part against their will or to try to discover a talent they do not possess.

Applause:-

- Must be for the effort as well as for the achievement
- Should be led by a cheer leader who is not a camp fire leader

Grades of applause:-

- When the whole camp wants to applaud itself simple clapping
- As a normal token of thanks and appreciation for the ordinary solo or patrol effort- bravo
- As a token of thanks for a very fine achievement: - either: Good! Good! Good! Very good! Or the singing of:-

Bravo, Bravo jolly well done

Bravo Bravissimo X 3

Jolly well done.

- For the achievement of the highest level: the troop yell formally led by the cheer leader

Closing

As the campfire approaches the climax, the campfire chief should prepare to end the ceremony.

1. Announcements/ notices should be given about three songs from the end
2. One of the two verses from the Holy Book might be read by the Patrol leader

- a. A verse of a well loved hymn
 - b. A verse of the National Anthem might be sung
3. Two or three simple prayers are enough and all should join in the prayer which our Lord Himself taught us {if you are only Christians}
4. A moment of silence:- and then ☐ Good night Scouts, sleep well☐

Points to remember:-

Time ☐ should not be too long ½ to 1 hour

Security: - avoid dangerous activities, dangerous tools near the fire

Teaching: - activities performed should display good image of Scouting

Good order: - required because of discipline

Noise: - should be controlled

Involvement: - all Scouts should be involved

Songs: - wrong keys {notes} should be avoided

Activities: - should be simplified for all to understand

- Educative
- From known to unknown
- Avoid fighting games

Language: - a Scout is clean in appearance, thought, word and deed

Activities

- To be simplified for all to understand and to be educative
- Start campfire from known to unknown
- Fighting games should be avoided

d) Flag raising ceremony

The patrol on duty should be informed in advance.

The flag should be hoisted correctly before the ceremony

b) Installation ceremony

When a scout is to be promoted to a patrol leader or to senior patrol leader

MODULE 4. THE SCOUTS OWN

It is:

- An acknowledgement of God and His creation and ourselves as part of it, expressed in a way that all the faiths that Scouting embraces can share in together
- A pause in our activity to discover something deeper and more permanent in the things we are trying to achieve or learn or enjoy
- A response to the creator of the gift of life

Which means they can be:

- A time of silence through a single sentence
- A kind of service of worship that might include:-
 - Music & singing
 - Stories
 - Readings
 - Prayers

Scouting, as conceived by lord Baden Powell, is a code of living that provides guidance on various dimensions of life, including the spiritual. This dimension of Scouting is committed to seeking spiritual value in life.

The 'Scouts Own' is a gathering of Scouts for worship of God and to promote further realization of the Scout law and Promise. It is a supplement -- not a substitute -- for religious observance.

The Scout leader should ensure that sufficient preparation is done. Those chosen to lead the Scouts Own should be informed in advance and, if necessary, be given time to rehearse.

The Scouts Own program should include:

- Opening choruses
- Opening hymn
- Opening prayer
- Reading from a Holy Book (Bible, Koran, etc)
- Chorus
- Preaching
- Prayer for families, Scout movement, the sick, etc. . Open forum
- Closing prayer
- Closing choruses/hymns

Aspects of the Scouts Own:

- Scouts Own can be conducted anytime during the camp.
- The Scouts Own may involve Scouts of all denominations on a voluntary basis; the Scout Leader should not force any Scout to attend or take part in practices that do not conform to their religion
- Where Scouts of mixed religions and denominations attend the Scouts Own programme, the service should be general to accommodate different religious practices.
- The Scouts Own should be short, simple and sincere
- The programme should take approximately one hour
- Scouts should not be forced to attend the scouts own

Materials useful for a Scout own:

1. A group of venture Scouts may get to the summit of a mountain after a difficult or challenging rock climb. As they stand or sit down to recover and enjoy the view, one of them says with feeling, "Thank God we made it!" and the others respond, "Too right!" {Another word for "Amen", they have experienced a Scout own, because they have recognized both their achievement and their growing because of it.
2. The glory of a sunset and the breaking of the dawn; the sky at night, the hills by day and the flickering friendship round a camp fire are absolutely natural settings for thinking – sometimes silently, sometimes aloud about the power that is the beginning and end of everything and our human place in the complex order of the universe. And that is a Scout own, without the need even for a mention of God by name only by implication. A Scout own is really a spiritual experience that happens.
3. A game or an activity that has demanded effort is body or mind or in tolerance and team work can be turned into a Scout own with a thought and a "Thank you" for God – no necessary for hymns or uniforms or readings
4. Scout own with songs and readings:-
 - Tell a story of adventure or challenge where people have relied on their faith in the creator God to achieve their goal
 - Sing a camp fire song about sharing and caring and serving e.g.
 - Kumbaya
 - Seek ye first
 - Alleluyah, alleluyah praise the Lord
5. Prayers: "Thank you God for making me" is a Scout own in a sentence

NB.

To be a Scout requires a belief in God not necessarily a complete understanding of God but a belief that this world has a creator and a power that helps it continue to exist. God is the power that is the beginning and the end of everything

MODULE 5. MAPS AND COMPASS**Objectives:**

By the end of this module, the learner should be able to:

- Define a map and a compass.

- Define various conventional signs, symbols and colours found in a map.

What is a Map?

A map is a representation of a landscape drawn on a flat surface.

There are different types of maps talking on different topics e.g. topographical maps, ordinance survey map, and political map climatic map, sketch maps. In Kenya Scouts should use the topographical maps.

Qualities of a good map

- A good map should have
- Title
- Scale
- Compass direction
- Key
- Should be relevant, current and up to date

Types of maps

There are different types of maps addressing different topics e.g.,

- Topographical maps Ordinance survey maps Political maps
- Climatic maps

Sketch Map

Incase there are no maps of the area available the course leader with the help of local Scout Leaders make a sketch map of the area showing the hike routes. The facilitators must remain with a copy of the sketch map while the participants go with another copy.

Conventional signs; symbols and colours

The key indicated at the bottom of a map normally shows the meaning of signs and symbols used on the map to represent actual features on the landscape (e.g. Dikes, rivers, road). The conventional signs may be in form of a diagram, abbreviation or colour. For example:

Colours - various colours and shades may be used to represent different geographical phenomenon. For example:

Blue - represents water features like rivers, streams, lakes and coastlines

Green - represents forests, woodlands, vegetation, and grassland. Relief - layers of colouring represent relief

Rocks - are represented by shades of orange and brown arranged in sequence

Scouts should learn how to interpret these symbols correctly.

Calculating Distance

Scouts need to calculate the distance between the point of departure and the point of arrival.

Straight distance: Draw a straight line between the two points, link with a ruler or edge of a paper and convert using scale.

Curved lines -Distance by road river, railway: since a road or river may not be straight, Scouts can use a string to trace the route and convert using the scale.

Grid Reference

Grid reference is a method of describing the position of a place on a map using numbered vertical (Easting) and horizontal (Northings) lines. The reading of the grid reference always begins with the eastings and then the northings. The grid reference can be written in four or six figures.

Compass Direction

The compass has four 'cardinal points'

North, South, East and West

Magnetic Variation

Magnetic variation is the difference between the magnetic north and the geographical north. When traveling within Kenya, magnetic variation is small enough to be ignored.

What is a Scale?

A scale is the relationship between a unit of length on a map and the corresponding length on the ground. It is also an expression of how much the area represented has been reduced on the map. A scale is important for understanding maps.

Types of Scales

There are three different types of scales:

Statement Scale

This expresses in words a relationship between a map distance and a ground distance. It is usually stated as for example, one centimeter, represents 16 kilometers. This means that the one-centimeter is on the map, and that the one-centimeter represents 16 kilometers on the ground. Verbal scales are commonly found on popular maps and atlases.

Linear Scale

This shows directly on the map the corresponding distance ground distance. Bar scales are the most common kind of scales found on maps, perhaps because their graphical nature makes them easily understood and they remain correct if the map is reduced or enlarged photographically.

Representative Fraction/Ratio Scale

This shows the relationship between one of any unit on the map and one of the same units on the ground. Ratio scales may be shown as an actual fraction, for example $1/24000$, but are usually written with a colon, as in 1:24,000. In the example, one unit of any length (one mm, one cm, one inch etc.) on the map represents 24,000 of those units on the ground (24,000mm, 24,000cm, 24,000 inches etc.)

Uses of Scales

- To determine distances
- To determine areas

The Scout should learn how to interpret these symbols correctly

In the scout programme camping, hikes and expedition form part of the essential outdoor activities. Scouts will have to find their ways using map and compass; therefore map-reading skills must be thoroughly taught and understood by Scouts.

Bearing

This is a method of describing a position of a place from another place using compass direction and degrees.

Method

- Join the two points on a straight line.
- Mark the compass direction on both points.
- Set your map and compass on a flat ground.
- Put the compass on your original position and turn the compass pointer to lie along the straight line.
- Read the angle formed after turning the pointer.
- Once you have oriented your map and compass and got your bearing set off and do not tamper with the compass.
- Do not use the compass near a metal or strong electric and magnetic field

EXERCISES

- Draw a map of your division on the scale 1: 1000 showing all the geographical features.
- Describe with relevant examples the different uses of a map.
- Use a simple map to locate various topographical features in your locality.

MODULE 6. OUTDOOR ACTIVITIES

Objectives:

By the end of this module, the learner should be able to:

1. Understand the importance of outdoor activities in Scouting
2. Organize a camp for the troop
3. Explain the meaning of camping standards

Definition of an outdoor activity

An outdoor activity is an activity done outside shelters.

Preparation

Camp preparation should be done by Patrol Leaders and discussed in the Court of Honour with the help of the Scout Leader.

Permissions

Permissions to go camping must be obtained from:

- Scout Leaders
- Sponsors
- Parents
- Area Commissioners
- Scout Authority - Local Associations.

Campsite Selection

When choosing the campsite ensure that the following are available:

- Water
- Security
- Good health and sanitation conditions
- Transport and communication

Budget

The Court of Honour should have a clear budget for the camp. The budget should indicate the expenditures and the expected sources of funds. The items in the budget should include:

- Food
- Camp fee
- Transport
- Equipment and material
- Emergency funds

Examples of outdoor activities

Hikes, Expeditions, Camping, Explorations, Tours, Campfires, Games, Songs, Tracking, Woodcraft signs, Pioneering, Observation and Estimation.

The Scout Leader should ensure that appropriate preparations are made to cover the budget and all the requirements during the camping trip. The patrol should also carry rations to be used only in the event of an emergency.

Purpose of outdoor activities

- Scouts acquire practical learning opportunities
- Scouts have fun and adventure/ for enjoyment
- Scouts get to learn about nature, human activities and cultures Scouts develop physically
- Patrol Leaders get an opportunity to practice their leadership skills.
- To develop the young people physically
- To develop the young people socially
- To promote their discipline
- To have the participants make their personal commitments
- To promote the skills
- Promote local, national and international peace, understanding and cooperation
- Breaking the monotony

How to organize outdoor activities

- Planning
- You must know the locality the activity is going to take place
- To have the necessary apparatus for the activities

- Activities to be timed carefully
- Participants to be given clear instructions
- The activities to be varied from time to time
- Gadgets to be used

Objectives

After the activities, Scouts should be able to develop:

1. Self knowledge
2. Need to explore
3. Need to discover
4. Need to know
5. Need to estimate

Conclusion

- There should be discipline in all activities
- In any danger stop the activity
- Activities should display Scouting spirit
- Start the activity at alert and end at alert. In order to check the members

a) Hikes

Definition

Hike is going out exploring an area with a specific aim of inquiring about the area, acquiring new knowledge, physical activities like climbing, canoeing, pioneering, caving and orienting. Hikes can be on foot, horseback, boat or cycling.

A hike should be planned with a specific aim. The specific aim will help answer the key questions: why, where, when and how? Below is useful information to help you plan for a hike:

- Hiking is an opportunity to learn about nature, physical development, human activities and culture, as well as to practice observational skills. Hiking also gives Patrol Leaders an opportunity to practice their leadership skills.
- The Scout Leader should survey the hiking route in advance and make all necessary arrangements. They should alert relevant administrative and community members as to when Scouts will pass through their areas.
- Scouts should be assigned special tasks to perform during the hike (e.g. following woodcraft signs, environmental study, collecting plant specimen or other items of interest).
- The Scouts should be told in advance about both the hike and preparation needed for the hike.
- The hike should be 24 kilometers long (for Chipukizi) and 30 kilometers (for Mwamba). The Scouts should not spend a night outside during these hikes.
- The Scout Leader should ensure that he/she follows the Scouts from a distance and keep an eye on them in case of problems. The Scouts should never be left unmonitored.
- Prior to the hike, Scouts should train in camp craft, first aid, lifesaving, packing, hiking and map work. The Scout Leader should not risk hiking with recruits prior to training.
- Before letting the Scouts hike, ensure that they clearly understand map-reading and general hike instructions
- If official topographical maps are not available, carefully make a sketch map of the area in which Scouts will hike.
- Before the Scouts set off, the Scout Leader should check their gear and dressing and assess whether each Scout is in good health.
- At the end of the hike, the Scouts should present their hike report in the form of a Hike Logbook.
- At the end of the hike, let the Scouts present their hike report in the form of a Hike Log book.

Other than observing things generally specific task may be carried out like study of:

- Human activities, daily life, culture, tradition, homestead, artwork weapons, industry, agriculture.
- Wildlife
- Plants and trees
- Drainage, soil, and rocks
- Location
- Tracking and stocking
- Participation in activities like climbing, caving, canoeing, pioneering

Planning and preparation

Both hikes and expedition done in known or foreign countryside needs thorough planning and preparation. Remember the 5Ps (proper planning prevents possible problems).

1. Route Selections and Planning

- The route should be carefully selected considering the objective of the hike and physical study of the route by experienced Scouter prior to actual hike is mandatory?
- The participants must study and understand the route and the area.

2. Budget

- A budget should be made indicating the cost of all necessary expenditure and sources of fund.
- It should include: Transport, foodstuff, material, camp equipment and emergency fund.

3. Equipment

- There should be a checklist of all necessary personal and patrol equipment. This equipment must be identified and obtained in advance.

4. Hike Routine

- The participants must make their own hike routing, which must be approved by the Scouter. The Scouts should stick to the routine.

5. Personal Health

- It is important to ensure that each hiker is in good health and physical condition. Avoid going out for hike when sick.
- If you doubt your health sought the doctors advice

Equipment

Equipments are essential for our convenient and comfort during hikes and camps. You should have a checklist of both personal and patrol equipment required. You should ascertain that you have them before you set of. When selecting equipment, consider their necessity and convenience in carriage.

Personal Equipment

- Scout uniform
- Sleeping bag or camp blankets
- Toilet set (tooth paste, tooth brush, comb, toilet soap, tissue paper etc.) Mug, plate, spoon, folk and knife
- Torch
- Water bottle
- Spare clothing□ s
- Rucksack
- Note book and a pen
- Whistle

Patrol Equipment

- Cooking utensils
- Water containers
- Stove and fuel
- Tent
- First Aid kit
- Maps and compass

Clothes

Your selection of cloths will mainly depend on the weather condition. In many areas, the weather at night may not be the same as that of the day.

- Select clothing for daytime walking and nighttime sleeping.
- Select a pair of waterproof clothing in case of rain.
- In hot condition, loose clothing's are preferable.
- If coldness is anticipated, select clothes, which can keep you warm. Use light clothing's in hot weather, they will keep you cool

Headgear

- Select a light and well fitting cap or hat to protect your head from direct sunlight

Foot Wear

- Low heel and well fitting shoes, which can allow expanding of the feet when it becomes hot, should be selected or you may end up with blisters.
- Heavy rigid soled climbing boots may cause discomfort. Use proper boots.
- Choose walking boots, which provide plenty of protection for your feet and support for your ankles on rough grounds. Rubber shoes can be slippery.
- Select thick soft socks and put them on well to avoid wrinkles.
- Long toenails may cause discomfort.

Packing

- Use your checklist to confirm whether you have packed sensibly and properly. To a Scout packing is important and requires practice. Carrying heavy loads can cause discomfort and disaster.
- Carry enough loads which can allow you to walk as straight as possible since the spine is meant to be kept as straight as possible.
- Loads should be carried high on the shoulder. Heavy articles should be packed high on the load.
- Balance the load for equal distribution of weight.
- Items to be needed often or quickly should be near the top.
- Use polythene bags to pack your items. Try help to keep them dry and tidy. Items like petroleum, soap and medicine should be kept away from food.
- Your rucksack should give you comfort as you travel daylong.

The scout camping skills and camp rules will help you a lot.

- You should arrive at the campsite before sunsets.
- Select level ground near water source. Have a tent or improvise shelters from twigs, grass, and branches of trees or polythene materials.
- Pitch your tent considering the forthcoming weather; ascertain the direction of the rain.
- Pitch the tent with rear pointing the direction from which the wind is coming.
- Erect tent firmly. Pegs should be pushed in the ground at angles of 45. Guy lines should be long enough.
- In case of rain dig drainage channel around the tent. When it is raining do not touch the roof.
- Keep movement in and out of the tent to the minimum.
- Arrange your gear systematically in the tent.
- Ensure your camp is guarded throughout.
- Make a comfortable sleeping platform. Lack of sleep may cause tiredness during the day.
- When breaking the camp clean the site, seal all the holes and dispose the waste by burning or burying.
- Remember-Guard against all risk of fire - Respect property

Food

Food keeps your body strong and healthy. As you hike, it is not advisable to skip a meal. Your body needs to replace lost energy; worn-out cells need to repair and replace themselves.

- Take food that is easy to carry, can be eaten raw or cooked quickly.
- *The type and quantity of food to carry along depends on:*
 - Whether you have to carry it all with you.
 - Whether you can get fresh supplies on the way.
 - Whether the food offers a balanced diet.

- Length of the hike.

Recommended hiking food

Potatoes, cassava, yams, spaghetti, maize meal, wheat flour, biscuits, beverage, dried milk, rice, boiled eggs, vegetable, fruits, chapattis, butter, dried fish, meat etc.

At the end of long tiresome day, you would have to get a place to put up a camp, cook, wash and rest for the night.

Emergency food

When in the wilderness you must carry extra rations not to be touched except in the event of an emergency. Emergency foods include: biscuits, glucose and chocolate.

Cooking

Fireplace is made using two blocks of stones

- Learn how to build and light fire in strong wind not forgetting safety precautions.
- Organize your cooking and save time.
- Remember a hot drink will help you do well as you wait for food.
- Badly cooked food should not be eaten. It is a waste of time and energy and money.
- Backwoodsman cooking skills will save you time.
- Scouts take special care to keep their kitchen clean

Traveling and navigation

- When planning, avoid country likely to be too difficult or dangerous.
- As part of the preparation study the country you are going to thoroughly well and understand it. Know unsafe grounds, sources of water, possible information may be obtained from map, books and resource persons.
- If you are on a hike as a patrol then you must have a patrol leader to co-ordinate you and a patrol navigator to lead you in reading the map correctly and hence taking the right route.
- Walk and work as a patrol together. No one should be left behind. Walk at the pace of the slowest member.
- Walk on high grounds.
- Take short and accurate bearings and keep on checking your bearing.
- In case you have lost your way; go back to the point where you took your last bearing and start again.
- Ensure you read your map accurately and always calculate distance to be covered between two points.
- Avoid unnecessary noise in the wilderness, you may provoke the wild animals or raise alarm to the natives.
- As you walk, maintain a steady speed and rhythm in walking, running, hurrying can be unnecessarily tiring and a waste of energy unless there is emergency.
- When it is dark or visibility is very poor the patrol should advance in a single file with the navigator at the rear
- In case of accident the casualty should be given appropriate first aid. He should remain behind with others while two people go to seek for help if he cannot be transported by the patrol.
- *Remember the safety code:*
 - Guard against all risk of fire
 - Respect properties
 - Respect the local people
 - Leave no litter
 - Protect wildlife, plants and trees - Safe guard water supplies

Writing Hike Log Book

As you walk across the countryside it is important to record your observation and draft sketches on the way, which would help you finally to write your hike, log book. The actual information, which should feature in the log, includes:

1. Progress along the route, time and dates.
2. Weather report
3. Details of the route
4. Drawings and illustrations
5. List of wildlife and vegetation seen and recognized.
6. Occurrences which are unusual, interesting or amusing
7. Specimens of flowers, stones, plant, insects etc

8. Report on specific task given during the hike.
9. Actual photographs may be included only if you can afford.

Note

- The scout leader to know the area first
- The scout leader to arrange for the apparatus to be used
- Proper timing for the hike
- Clear instructions for the hike
- To stop the hike incase of danger
- The scout leader should monitor the scouts through the hikes
- The scout leader to insist on observations
- The scout leader to check the right gadgets to be used

b) Expeditions

The arrangement for the expedition as the same hike {common goal}

c) Exploration

- Can be done either in patrols or pairs, also it can be done by bicycles or on foot
- The arrangement is the same as for hikes and expeditions
- As a rule you should have an objective for your exploration

d) Tracking

- It is one of the principal ways by which Scouts gain information when they are out walking whether in town or country.
- The most important is a scout has to learn is to let nothing escape his attention

What to remember

- Practice the observation
- Using marks and signs
- Using permanent land marks

e) Tours

A journey made for a purpose e.g. educational

- The scouts to plan for the tour
- To identify the area
- The scouts to time their tour
- The scouts to organize for their transport and food

f) Games

Purpose of Games: Games are very important in the learning process of young people. The saying goes: "All work without play makes Jack a dull boy."

Games in Scouting are useful for:

- Entertainment
- Education
- Developing self-confidence

Games and plays form a great and important part of our work as scouts

Objectives

- Keeping physically fit
- Morally fit
- Mentally fit
- Enjoyment
- Social development
- Revision of skills learnt

- Teaching of new skills
- Encourage team work
- Motivate the slow learners
- Create cooperative spirit
- Competition purposes

Uses

- To release stress
- Recreation
- Stimulate muscles
- Break monotony
- Develop talents
- Practice skills
- Team spirit
- Character formation

Advantages

- Promote scouts health, strength and develop character
- Introduce competitive skills
- Instill elements of obedience, truancy, discipline and self control
- Encourage curiosity and cooperation
- Revision of skills
- Team spirit
- Testing creativity and responsibility
- Improve pulse rate and oxygen tolerance capacity
- Team work, personal character and sportsmanship
- Improve body posture and building of muscles

Rules in Games

Rules to be observed and stressed very much

Types of games

- Intellectual games
- Traditional/ cultural games
- Relay games
- Team games
- Sense training games
- Straight line games
- Circle games
- Quiet games
- Night games
- Wide games
- Compass games
- Project card games
- Exercise games
- Revision games
- Competitive games

General tips on playing of games

- Instructions to be simple and clear
- Use simple equipments
- Try out new games with PL before playing with the group

- Be very firm with any sign of cheating
- Insist that all games start and end at alert
- Stop immediately any game which gets out of hand
- Provide opportunities to play to all participants
- Choose the game carefully so as to preserve the balance between work and play
- Don't have too many relay and inter patrol games e.g. round games
- Remember their discipline is vital to enjoyment and is a good form of character training
- Periodically discuss the objects of games at the patrol leaders council
- Try to avoid dirty words fighting and use of dangerous equipment
- The wider the game the tighter the rules and discipline
- Insist on discipline from the start to the end
- Begin at alert and end at alert
- Make use of the PL's as much as possible
- Games should be varied
- Invent as many games as possible
- Don't let the scouts do games if prohibited by the doctor
- Every game should correspond with the players

Preparation of games

- Planning
- Study the area
- Apparatus/ equipment to be provided and appropriate
- Specifications {how it will be played}
- Number of participants
- Time to be taken
- Clear instructions
- Title of the game

Games should be: -

- Enjoyable
- Disciplined
- Easy to play
- Entertaining
- Fair

They should develop: -

- Sportsmanship
- Use fullness
- Courage

g) Songs

Uses

- Can be used to report and comment on current affairs for political pressure
- Propaganda
- Reflect the mood of public opinion
- Songs of insult
 - Challenge
 - Satirical
 - Can be used as a political weapon
- At a local level singing can take the place of the press, radio and publication as a way of expressing public opinion

and bring pressure to individuals

- This indirect means of communication with some one in power through the artistic medium of a song is a way by which the singer hopes to influence while at the same time avoiding the open danger of speaking directly.
- Songs are also directed against opposing groups or individuals
- Songs can be used to assert the unity of trade union groups
- Songs can be used as a means of communicating and expressing personal enmity between hostile people/ parties
- Abusive songs against ordinary individuals are also sometimes directly used as a means of social pressure enforcing the will of public opinion
- Songs are non-accepted by political parties as a vehicle of communication propaganda, political pressure and political education.
- Soothing the child to sleep
- Songs during Mau Mau time were the most powerful propaganda weapons of the whole Mau Mau movement and means of communication

h) Camping

Types of camps

1. Founderee camps
2. Competition camps
3. Jamboree camps
4. Training camps
5. Holiday camps
6. Hike/expedition camps etc

Why take Scouts to camp

1. Advantages

- a. Enjoy living together by caring & sharing- socialize
- b. Learn how to communicate
- c. Learn to be self reliant
- d. More activities are carried out
- e. Training is carried out uninterrupted
- f. Chances of exploring new places
- g. Testing can be carried out especially on proficiency badges
- h. There is self assessment of what one can do
- i. Time to enjoy games and also face challenging activities
- j. They learn tolerance
- k. Time to guide & counsel

2. Disadvantages

- a. Take advantage on the others while doing work instead of team work
- b. Poor programme causes indiscipline
- c. Avoid work at home by asking for more days in the camp
- d. Some take the camp as a holiday
- e. Some become unthrifty
- f. Financial burden to parents & sponsors
- g. Time wasting if programme is not properly followed

3. How to achieve that

Planning for A Camp

You're starting point when planning any adventurous activity is to look at Your Association's "Policy, organization and rules". A large part is given over to activities and includes information and advice on supervision, emergencies, camping, expeditions and rules of some specific adventurous activities such as overnight camping.

These rules are for the safety of the Scout Leader and for those for whom he/she is responsible.

1. Programme on how to spend the days in the camp
2. Menu to be used at the camp
3. Permission from sponsors and parents

4. Proper camp equipment
5. Source of water and source of fuel
6. Security and medical care
7. Wild animals and biting deadly insects

Camp layout

1. Positioning:- tents, kitchen, toilet, cloth line, stores, gadgets, tools
2. Movement within the camp- is it easy?
3. Obstructions- e.g. stamps, stones

Camp equipments

1. Tents
2. Tools
3. Cooking utensils
4. Ropes, cords and strings
5. Lamp, oil
6. First aid kit
7. Water containers
8. Games equipment

Camp hygiene

1. Toilets
2. Wet and dry pits
3. Disposal of litter
4. Collection of litter round the compound
5. Airing the tents and blankets/ sleeping bags
6. Cleaning lamps
7. Keeping food covered
8. Keeping all utensils clean and dry
9. Not mixing food with soap, salt etc which might spoil
10. Storing different things in separate stores
11. Drying all the wet clothes and ropes
12. Potato, bananas and fruit seedlings should be disposed off immediately
13. No eating of wild fruits around the camp unless sure of safety camp gadgets
14. All gadgets must be made use of
15. Gadgets must have space for ease of movement

Camp rules

1. No playing bout the tent, gadgets and fire place
2. No going out of the camp without permission
3. Sickness should be reported to the scout leader immediately
4. Sleeping and waking up time to be observed strictly
5. Camp language should not be abusive but polite
6. Security- some areas, there should be night guards and day guards
7. No playing on trees
8. No swimming without permission and a life guard must be present
9. Duties must be shared well
10. All must cooperate to make the work easy

Note:

- At the end of the camp, there must not be left any trace of camping
- Clean the area, collect litter and burn or bury that which cannot be burnt
- Leave the place as natural as you found it
- Make sure the fire is completely extinguished

Equipment and material

Emergency funds

The Scout leader should ensure that appropriate preparations are made to cover the budget and all requirements during the camping trip. The Patrol should also carry emergency rations (to be used only in the event of an emergency).

Equipment

The Court of Honour should ensure that necessary camping equipment is obtained in advance. There should be a checklist of both Patrol camping equipment and personal camping equipment.

- **Patrol camping equipment includes items** such as:
- Tents
- Water containers
- Utensils (like sufurias, frying pans, knives)
- Tools (like jembe, panga, slasher)
- Lamps
- First aid kit
- Map and compass
- Games equipment

Personal equipment includes

- Uniform and spare clothes
- Toilet kit (toothpaste, toothbrush, comb, soap, towel, tissue paper)
- Rucksack
- Water bottle
- Spotlight
- Sleeping bag/camp blanket

Cutlery (plate, fork, knife, spoon)

Camp programme

The camp programme should reflect all the activities to be done in the camp and the time when they will be done. The camp program should be developed by the Court of Honour and should reflect the objective(s) of the camp. The campers should adhere to the camp programme.

Camp rules

The Court of Honour must establish camp rules to be followed by all. These rules should be read to campers before setting out for the camp.

- The camp should always be guarded.
- The camp should be kept clean and orderly
- No one should leave the campsite without permission
- Sickness or accident should be reported immediately
- All the Scouts should obey and live by the Scout Law and Promise in the camp
- Each member should perform duties assigned to him/her
- Camp programme should be adhered to
- All Scouts should take care of the environment and protect it
- Equipment should be obtained through the Quartermaster.

Duty roster

Duty roster for certain tasks such as cooking, guarding and cleaning should be drafted in order to maintain good order and discipline.

Camp layout

You should arrive at the campsite before sunset. Upon reaching the campsite, campers should make a camp layout, set up necessary equipment, and erect their tents. A Scout camp should be well organized with each object in the right place.

Before setting up your camp consider the ground and its drainage capacity as well as the direction of the wind and other

weather conditions. This will guide you on where to put the kitchen and latrine. Select level ground near a water source

Menus

On camps and activities, often with long days, Scouts will need considerably more energy than usual and will probably eat far more than usual to get it.

If backpacking and carrying all food, particular care must be taken that meals are nutritional balanced and sufficient for the energy expended. Never allow food quantities to be cut as a means of reducing carrying weight.

Travel

Methods of travel need to be considered and care taken not to overload vehicles with people and/or equipment. Make it clear if the scouts will be offering petrol money or expenses.

Cost

This might come first or last depending on circumstance. The cost can be calculated in two ways. One method is to add up all of the costs and then add 10% to cover emergencies and divide by the number of people going. Alternatively you can add up fixed costs, which at minimum might be good, and the cost of a particular activity then fix a price that is acceptable and do whatever else you can for that amount of money.

Safety and Risk Management

In planning for a camp, safety is of paramount importance. All parties must be trained in the use of route plans. They must also carry emergency contacts and have preplanned good and bad weather alternative routes.

It is very important that First Aid kit be carried every time during camping. It should be placed in a very accessible place and if possible as many Scouts as possible should be conversant with basic First Aid

What is the purpose of inspection during camping

1. Personal □ cleanliness & tidiness, identifying & sorting problems
2. Group □ pride in patrol, orderly living
3. Clothing- sorting the wet from the dry, sorting the clean from the dirty ones
4. Food □ hygiene cooking & storage, hygiene waste disposal
5. Dixie□s and dishes- cleanliness and storage
6. Fires- control of size, provision of wood & safety
7. Stores- storage of food & maintenance

What standards should leaders expect?

1. This is dependent on age, experience & existing standards within the patrol
2. Younger boys need greater attention and more detailed guidance
3. Older boys should be encouraged to set high standards for themselves and for their younger members

How regularly should inspections occur?

1. This is dependant on the age, experience of the patrol
2. Younger boys appreciate regular routine
3. Older boys require reminders
4. Inspections should not be a ritual controlled by adults
5. Spot inspections and informal tours by leaders & patrol leaders should be encouraged
6. Morning inspections during the early days of the camp help to establish routine of tidiness and order on the patrol site

Who should be responsible for inspections?

- Initially the leader and the assistant leader
- Shared with senior patrol leader and the patrol leaders

How can Scouts be encouraged to achieve high standards?

1. They should appreciate the purpose of inspection
2. Praise them rather than criticize them
3. Reward good efforts; attempt to acknowledge all high standards not just the best
4. Training should be part of the pre-camp training programme
5. Use of books. Enjoy camping and Scout camping
6. Encourage a tradition of high standards in the patrol at patrol leader□s council

Make individual comments to the patrol leader from time to time using praise or helpful suggestions as necessary

Exercises

- Name ten outdoor activities.
- Make a design of a camp layout.
- Prepare an outing for two days for your troop.

MODULE 7. PIONEERING/KNOTS & LASHINGS

Objectives:

By the end of this module, the learner should be able to:

- Define and understand Pioneering and Rope Work.
- Tie different types of Knots and state their uses.

What is Pioneering?

Pioneering is a fun activity that calls upon Scouts to use engineering skills to construct or build bridges, watchtowers, suspended tents or useful camp devices. These skills can also be used to construct health-promoting devices at home.

Qualities of a good Pioneering Device

- Purposeful
- Well-designed
- Properly constructed
- Firm and simple
- Correct Scout knots and lashings used in the right places.

Types of projects

Gadgets should be;

- Well-designed
- Properly constructed
- Firm and simple

KNOTS

Types of Knots

REEF KNOT

For joining of the same thickness and material

For trying ends of bandages,

BOWLINE

For rescuing someone from a hole or ditch

TIMBER HITCH

Timber hitch is used for tying bundle of wood. For starting diagonal lashing

FIREMAN'S CHAIR KNOT

For rescuing somebody from a tall building or from a tree

MANHARNESS

For making a loop that does not slip - which can provide a grip when pulling something

SHEET SHANK

For shortening a rope without cutting, for strengthening a weak section of rope

CLOVE HITCH

For tying a rope to a spur, for starting and ending square lashing

SHEET BEND

For joining ropes of different thickness and material

For tying a rope to a loop

ROUND TURN AND TWO HALF HITCHES

For joining a rope firmly to a spur

FISHERMAN'S KNOT

For joining two wet ropes

DIAGONAL LASHING - For joining spurs that crossed diagonally

It is started using a timber hitch and finished with a clove hitch,

SQUARE LASHING

For tying spurs that cross at right angle. The square lashing is started with a clove hitch and after the frapping; it is ended with a clove hitch.

SHEER LASHING

For joining two parallel spurs. It is started and finished using clove hitch,

FILIPINO LASHING

For joining spurs that cross diagonally. It is used instead of diagonal lashing. It is started using a loop around the two spurs and ends a reef knot on one spur.

Exercises

- Make a useful camping gadget using pioneering and rope skills.
- Tie eight different knots and lashings.
- Teach a troop member how to make five different knots and lashings.

MODULE 8. SCOUT ORGANISATION

Scouting has a world membership of over 28 million youths and adults. There are over 216 member countries and territories. The "World Organization of the Scout Movement" is the name of the organization within which the world conference, committee, Bureau and other elements of international scouting function.

The World Organization of the Scout Movement is an international, non-governmental organization, composed of all its recognized national Scouts organizations. Its governing body is the world conference.

World Scout Conference

The conference is the "General Assembly" of Scouting, composed of all member scout organizations. One National Scout Organization is recognized per country, and has six votes. Where there is more than one Scout Association in a country, a federation is formed for world membership. Basics for an organization's recognition and membership include adherence to the purpose and principles of World Scouting, and operation as an independent, non-political and voluntary organization. The conference meets every three years. The conference was held in Kenya in 1973, and it was the 24th meeting.

The World Scout Committee

The World Scout committee is the executive of the World Scout conference. It consists of 12 members from 12 countries elected by the conference. Each member serves a six-year term, one third retiring each conference. The committee meets at any time.

The World Scout Bureau

The Bureau is the secretariat carrying out the instructions of the conference and committee. The head office is in Geneva, Switzerland.

The Bureau has five other regional offices. The offices are:

- Africa Region in Nairobi, Kenya (main office)
 - Operation centers in Dakar in Senegal
 - Cape Town in South Africa

- European Region Geneva, Switzerland
- Brussels, Belgium
- Arab Region in Cairo, Egypt
- Asia- Pacific Region in Manila, Philippines
- Inter-American Region in Santiago, Chile
- Eurasia region in Yalta, Ukraine (main office)
-Moscow annex, Russia

The Bureau helps associations improve and broaden their scouting by conducting trainings, community development seminars and workshops, preparing publications and advising on organization, financing, communications etc, by visits and by correspondence. It also helps arrange such global events as World Jamborees, and acts as liaison between the World Organization of the Scout Movement and other international bodies.

Kenya Scouts Association

The Kenya Scouts Council runs the Kenya Scouts Association. The council meets annually, and the Chairman is the Chief Scout.

In the Annual General meeting of the Council, an Executive Committee is elected and it meets every two-month. The Executive Committee runs the affairs of the Association on behalf of the Council. The Chairman of the Executive Committee is the Chief Commissioner.

The National Executive Committee has other sub-committees that work under it. Examples of the sub-committees are:

- Management Committee
- Adult Resources Committee
- Community Development Committee
- Security & Special Programmes Committee
- Programme Committee.
- Communication Research & Gender Committee
- Campsites & Training centers Committee

The National Executive Commissioner is the secretary to the Kenya Scouts Council, the National Executive Committee and an ex-officio to all other sub-committees at the National level. An Executive/director of the above department at the Scouts Headquarters is the secretary to the sub committee.

From the National level, each province should have a provincial scout council, headed by an Assistant Chief commissioner- province, as the chairperson. He/she shall be a lay member/non uniformed and will represent the province in the National Executive committee. All Area Commissioners, Traveling Commissioners and Trainers in the Province form the Provincial Scouts Council. The provincial council may co-opt one lay member from each of the local Association in the Province and such other persons as they desire.

Kenya is divided into Areas, corresponding to administrative districts, each of which is headed by the Area Commissioner with one or more local Associations. The extent and boundaries of areas are settled by the Chief Commissioner and should, if possible, be confined to such limits that the Area Commissioner and the Assistants can have constant personal touch with all Local Association, groups, and Scouters within it.

National Scout Council

This is the supreme policy making of the Association

It is composed of the chairman, vice chairperson; and the members of the Council,

The National Executive committee

This is the committee that meets, discusses and implements the decisions of the Council. It is also supposed to interpret the constitution and other related documents as well as formulate the policy for the Association, for Councils approval. Normally it is composed of the Chief Commissioner, as the chairman, the Deputy Chief Commissioner, chairpersons of the sub-committees, Honorary Treasurer and other elected and nominated members.

Management Committee

This is the committee charged with executing the resolutions of the Executive Committee on its behalf and carry out any other business aimed at the development of scouting and also manages the secretariat and the finances.

National Secretariat

This is the National Headquarters, which is charged with the responsibility of offering the secretarial and co ordination of scouting nationally.

Ideally these structures should be replicated down the structure to the district and area levels.

The leadership of the Association at the national level

The Patron

In most cases the patron is elected by the council and has to be a distinguished person. He is supposed to encourage and give all possible support for developing scouting in the country as well as appoint the chief scout.

The Chief Scout

In most cases the patron from amongst the Scouters who will have rendered outstanding and credible service to the movement and the nation does the appointment of the chief scout.

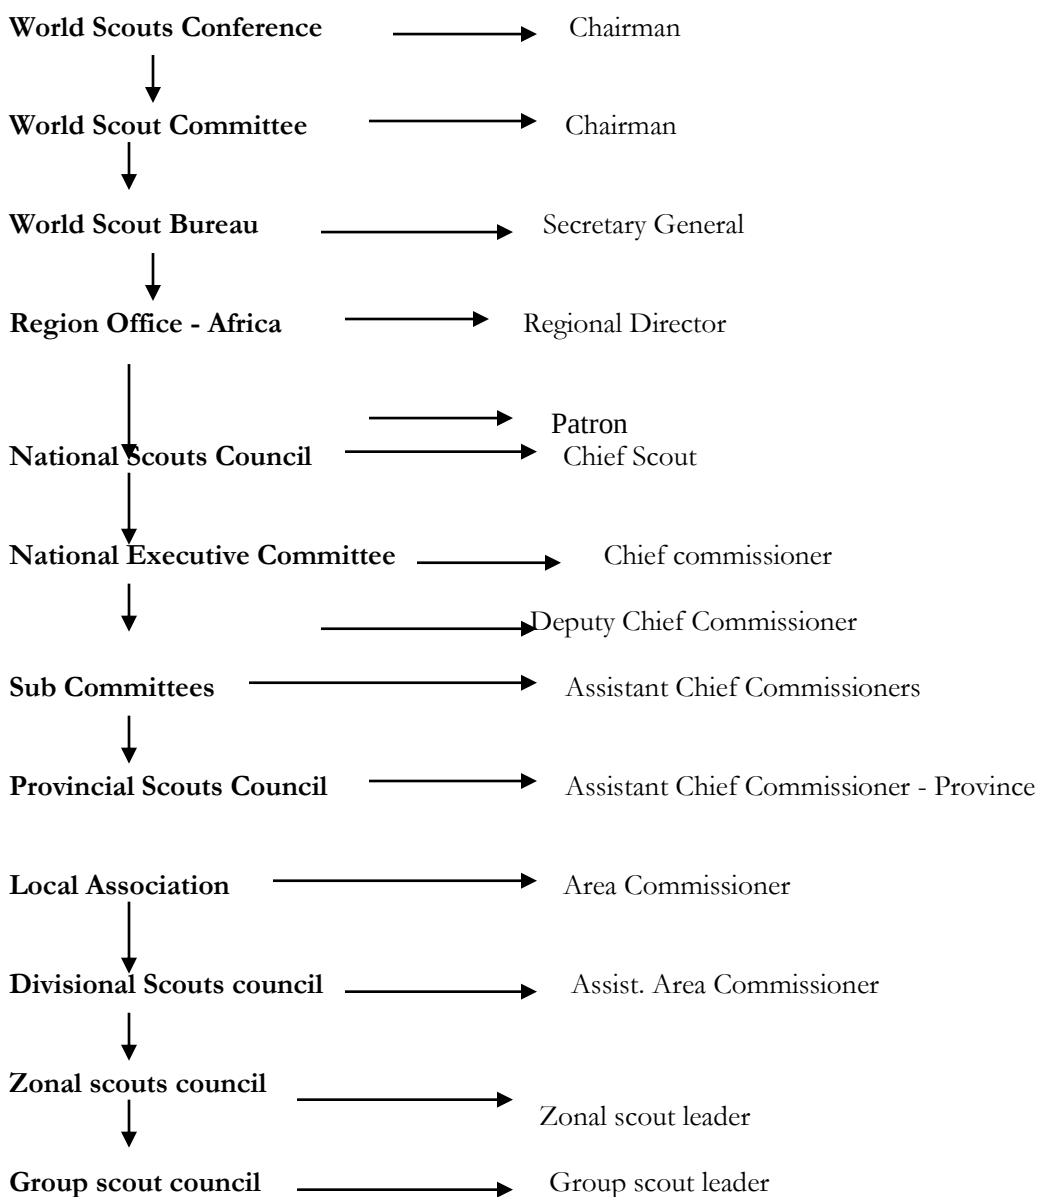

His/her main duty is to help in the development of scouting to the highest standards.

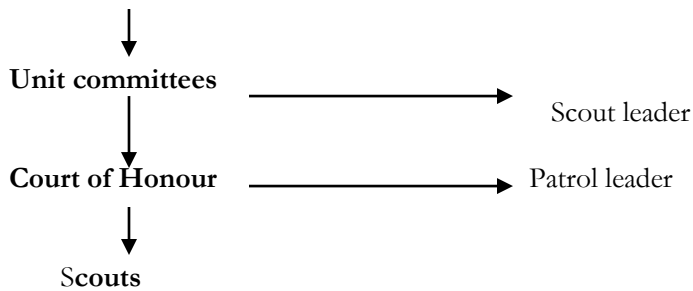

The Chief Commissioner

He is appointed or elected from Scouters of integrity and wide experience in scouting for a given period. His main duties include to supervise and direct generally and specifically the execution of all the directives and decisions of the council.

National Executive Commissioner

This is the professional who heads the National Secretariat /Headquarters□ normally he/she is picked after a competitive recruitment process. His main role is to co ordinate the activities of the National Secretariat to help in developing scouting.

MODULE 9. FLAGS

Definition:

A flag is an emblem representing an organization, country or institution.

Types of Flags used by Scouts.

1. **National flag**-This is an emblem of the state where the scouts originate from.
2. **World scout flag**-This is an emblem of the world organization of the scout movement. It is composed of the world scout logo in white on a purple background.
3. **Troop flags**-This is a flag designed by the troop members and it must be approved by the local association. It is also the jurisdiction of the L.A to approve the colours of the scarf.
4. **Patrol flag**-Patrol flags are triangular in shape and white in colour. The picture of the animal, bird or the feature of the patrol is named after is printed on the flag with a black or red Colour.
5. **Sponsors flag**-These are flags belonging to the institutions sponsoring the scout troops e.g. learning institutions, company etc

THE KENYA NATIONAL FLAG

- Permission to fly the national flag can only be obtained from the office of the President or the office of the attorney general.
- The national flag can be flown in honour of the head of state, foreign monarch or head of state of other countries or otherwise as directed by the office of the president.
- Flags are supplied to authorized institutions and organizations through the district or provincial government offices. Defaced flags should be returned to the same offices.
- Do not make your own flag, parch or mend defaced flags.

Respect

- As the flag is our national emblem the law requires that it should be treated with due respect.
- The flags must be flown in full mast between 6am and 6pm evening unless otherwise as stated by the office of the president.
- The flag should be flown at appropriate time, function and place.
- All people within a reasonable distance should stand attention as a token of respect when the flag is being flown or lowered.
- The scouts in uniform must salute the flag as a sign of respect and patriotism.
- When flying the national flag with other flags it should be on the tallest post. It should be flown or lowered first before the other flags.

Symbols on the Flag

The national flag was first flown on the eve of independence 12th December 1963 .It is an emblem of the land, people and the government of Kenya. All Kenyans are united under the flag.

- **Black**-Stands for the people of Kenya.
- **Red**-The struggle for freedom and the blood that was shed before Kenya could become independent.
- **Green**-Rich heritage of Kenya, natural resources, agriculture, forest and wildlife.
- **White**-The symbol of peace and unity.

- **Shield and spears**-stand for our determination, defense for the freedom of our country.

Flying the national flag

The flag should be correctly folded and hoisted by the scout on duty before the flag breaking ceremony. The Scouter should inspect if it is correctly done.

Folding the flag

- To prepare the flag for hoisting fold it in half-length size, then fold it in half-length again.
- Roll it into a tight bundle so that the toggle and the rope are on the outside.
- Take the flag rope twice round the outside of the bundle in the middle and push a loop through the two turns of the rope.

Hoisting

- To hoist the flag fasten the halyard to the toggle by means of a clove hitch
- Fasten the other end of the lanyard on the flag rope using sheet bend.
- Pull the halyard so as to raise the flag to the top of the mast.
- Fasten the halyard securely in the flag mast.

Breaking the flag/flying

- The scout breaking the flag should be in scout's uniform.
- The troop stands at a horseshoe facing the flag. The Scouters should stand at the opening just behind the flag post.
- The scout on duty calls the troop to attention, marches smartly to the flag mast.
- He blows the whistle then pulls the lanyard and the flag breaks.
- Fasten the lanyard securely on the mast.
- Make two steps behind and salutes the flag. All the scouts in uniform also salute at the same time then follow the whistle.
- The scout then marches back to his position and call the troop to stand at ease.

Lowering the flag

- The scout on duty calls the troop at attention and marches to the flag post and salutes the flag. The rest of the scouts in uniform also salute.
- He unties the lanyard and blows the whistle.
- He pulls the flag down using the halyard, when it reaches the shoulder he blows the whistle.

Flying flags at half-mast

The national flag being a national emblem may be used to express the states condolences to the head of state, foreign monarch and heads of states of other countries in case of death or other circumstances as deemed fit by the office of the president. In any circumstance where the government requires the flag to be half-mast. Official announcement is made directing the days when the flags will be flown at half-mast. Scouters and Scouts should strictly follow the government direction.

Flying more than one flag

- The national flag should be flown or lowered before other flags.
- The national flag should be on the highest mast.
- When flying flags at the camp or scout centres the national flag should be on the right hand side while facing the gate from inside the camp.

Marching with flags

- When marching the flag bearer should be in the front just behind the commander.
- When marching with two or more flags the bearer of the national flag should be in front of the other flag bearers.

MODULE 10. BASIC DRILLS, SCOUT SIGN AND SCOUT SALUTE

A) Commands in drills

1. AT EASE-the left foot makes a sideways step away from the right leg and the hands are taken behind.
2. EASE-the command allows any person to relax and take any position.
3. ALERT/ATTENTION-The feet should be together allowing right and left feet to form a 90-degree angle. The hands should be straight to the body with the palm folded to form a relaxed fist.

4. LEFT TURN-Is a ¼ turn to the left starting with the left foot. The left leg spins straight on the hind sole while the right foot spins on the toes.
5. RIGHT TURN-Is a ¼ turn to the right starting with the right foot.
6. ABOUT TURN-Is a ½ turn to the right.
7. DRESS UP-Is spacing command. Each troop member lifts the right arm straight to the shoulder of the member on the right. The arm is parallel to the ground.
8. DROP-A command to leave the position of dress up.
9. FORWARD MATCH-Is marching forward with the left arm.
10. OTHER COMMANDS-Fall in
 - Fall out
 - Dismiss
 - Eyes right
 - Quick/Slow mark time
 - Half salute/full salute

B) Scout sign (half salute)

Is made by right hand in the way the salute is made but the fingers are only raised up to the level of the shoulder. (While standing attention)

When Used:

- Recitation of the scout promise
- When a scout is not in uniform.
- As a greeting to other scouts or as a means of identification.
- When saluting the national flag and not in full uniform.

Scout salute

Is made by the three middle fingers of the right hand which are raised to the side of the head above the right eye

Significance-

The salute just like the three parts of the world badge signifies the three parts of the promise □ 3 pillars/principles of Scouting.

When Used

-When greeting fellow scouts

-As a sign of respect to those in authority.

-When breaking the national flag.

-When carrying a staff (stave)-the salute is made by the free hand but the palm should be facing down. The three fingers and forearm should be parallel to the ground.

Scout handshake

Scouts use the left hand when shaking hands. This is a tradition started by the Founder and can be used to identify with other scouts.

Although the scout's handshake is very common, all scouts in the world do not use it, so there are times when some scouts will shake hands using the right hand. There is nothing wrong with this.

MODULE 11: FIRST AID

Objectives:

By the end of this module, the learner should be able to:

- Appreciate the importance of first aid
- Detect and assist during emergencies.

What is First Aid?

First aid is the immediate medically recommended treatment given to a casualty of an accident or sudden illness, using available resources

Aim and Purpose of First Aid

- To save and sustain life
- To prevent the casualty's condition from becoming worse
- To promote recovery.

Qualities of a First Aider

Observant: Quick in identifying symptoms/ history

Dexterous: Handles the casualty carefully without causing further injury

Tactful: Kind and comforting to the casualty

Resourceful: Able to use locally available materials

Explicatory: Clearly and precisely relays information

Perseverant: Never gives up.

Discriminating: Prioritizes whom to treat first and fast

Empathetic: Human and compassionate.

Examples of First Aid Treatment

Nose Bleeding

Nosebleeds can be caused by external force on the nose or forehead (a blow) or certain illnesses.

Treatment

- Make the casualty sit with the head tilted downwards
- Loosen tight clothes around the neck and chest
- Ask the casualty to breathe through the mouth as he/you pinches the soft part of the nose for about ten minute
- Do not plug the nose but clean around the mouth and nose areas,
- Advice the casualty not to blow the nose or remove blood clots in the nostril for some time
- If bleeding does not stop, seek medical help.

Fainting:

Fainting is a momentary loss of consciousness resulting from lack of oxygen flow in the brain. Fainting is caused by:

- Shock (sudden good or bad news) or strong emotion
- Hunger
- Physical pain
- Standing for too long
- Fatigue

Treatment

- Move the casualty to shade/shelter
- Loosen tight clothing around the neck, waist and chest
- Check breathing/pulse rate
- Check and treat other injuries e.g. cuts/bruise
- Reassure the casualty.
- When the casualty is relaxed and conscious, give sips of cold water or other beverages, but not alcohol
- If the casualty is still unconscious, do not give any food or beverage by mouth
- Put the casualty in recovery position
- If the breathing stops give artificial resuscitation

Wounds:

A wound is a discontinuity of skin and any of the body tissue leading to loss of blood.

Types of wounds

Cuts: Incised (e.g. by knife or blade)

Torn: Lacerated (e.g. by barbed wire)

Puncture: Hole (e.g. by nail or needle)

Abrasion: Sliding or friction

Gunshot: Small entry but large exit

Bruise: Resulting from a punch or a fall.

Treatment

- Wash your hands clean
- Wash the wound gently (from inside to outside)

- Remove any foreign body visible/manageable
- If bleeding stops, gently apply direct pressure
- Dress small wounds with adhesive bandage and large wounds with a pad and bandage
- If you are in doubt about the injury, take the casualty to the hospital for further treatment

Choking

Choking is caused by blockage of the throat/ airway and / or failure of the epiglottis

Treatment

- Open the airway and remove any foreign body in the mouth/nose
- Help the casualty to bend forward
- With the heel of the hand, slap smartly about four times between the shoulder blades to dislodge any objects

Treatment for infants

- Lay the baby facedown along your forearm
- Use your arm to support the head and chest.
- Slap smartly between the shoulders about four times
- If the situation does not improve seek medical assistance immediately

Summoning Help

Keep three things in mind to help you deal with emergencies, these are:

1. Where to get help
2. How to get help
3. What to do while waiting for help

Where to get help

It is important as a Scout that you know where the nearest hospital, telephone, fire services, police station, or administration post are located. This is especially important when you are planning to go camping or on an expedition.

How to get help

Accidents or emergencies can happen even where we are very careful. It is therefore important to know what to do in such cases and where to get help. In some cases you may need to use the telephone if there is one. If there is no telephone you can send a Scout or other person(s) to get the necessary help. Whatever the case, makes absolutely sure you, or someone else, goes for help and gives the correct information on:

- The exact location of the emergency or accident
- The nature of emergency
- The kind of assistance needed.

What to do while waiting for help

In case of fire, the most important step is to rescue any people who may be trapped in the fire, and help to put it out.

- Do not use water to put out electricity or oil fires. Water conducts electricity and should therefore not be used on exposed 'live' wires. Oil also floats on water. Therefore, if you pour water on burning oil the fire will most likely spread
- Make sure you know how to use a fire extinguisher. Before you use any fire extinguisher first read the user instructions written on the side
- Note your escape route when going inside a burning building to avoid being trapped inside
- To avoid suffocation, breathe through a wet handkerchief and crawl on the floor where smoke is less dense.

Remember- more people are overcome and die of smoke inhalation than of fire/burning to death.

In case of grass or bush fires, organize people to beat the fire with wet sacks, green branches, etc. At the same time, make sure everyone stays away from smoke, preferably by fighting the fire with the wind at your back (the wind blowing the fire away from you).

Rescue

- If a person's clothes are on fire, push them down and roll them over in a blanket, coat, carpet, etc. Covering deprives fire of the oxygen it needs to burn
- When someone is unconscious, give them artificial respiration, and then carry them to safety using the fireman's lift. If he is too heavy, drag him on the ground to safety
- In case of burning houses, warn people to stay out of the way of collapsing roofs and flying sparks. Close as many doors and windows as possible to reduce the oxygen that needs to burn
- As soon as you have rescued a casualty, treat him first for burns then for shock.

EXERCISES

1. As you are walking along a path a cyclist passes you and accidentally falls off the bicycle.
2. Explain how you will go through the process of assisting him.
3. Explain in details examples of first aid treatment.
4. Demonstrate how you would help a person who is nose-bleeding

MODULE 12. PROGRAMME PLANNING

PROGRAMME - The word programme is made to be understood depending to the sphere (field) based on or in reference; i.e. organization, company, sectors, education sector, etc

- In scouting it means: a plan on which the materials to be learned is based. The totality of what the youths (scouts) do in their activities.
- The word totality refers to wholesome needs, skills and attitudes scouts cover through challenging experiences as they grow up (chronologically, mentally and spiritually). This reflected in progressive process of personal development
- It can be explained clearly focusing on:

WHAT, HOW AND WHY

WHAT - scouts' programme should encompass all the activities which youth do that must be attractive and challenging

HOW - This put emphasis in the way the purpose in scouts programme is achieved.

It reflects on scouts method of carrying out the activities contained in the Programme

WHY - This gives the summary of the scouts programme as the only means of achieving the purpose of scouting basing on the fundamental principals

NB- the scouts (youth) programme require regular re-appraisal and adjustment to suit the changing needs, aspiration and trends of young people and their society in improving its quality (This makes it more relevant to current needs)

Definition of Planning

A plan is an organized forethought, which specifies what organization intends to do, when to do; how to do and who to do

Planning helps an organization to influence its future by deciding what it wants to achieve

It gives direction clearly and directs the organization towards achieving efficiency and effectiveness. (

It is a systematic process, which consists of setting and co-coordinating objectives to be achieved, defining the means of achieving them and measuring process.

Purpose for planning

- Have foresight interns of future development,
- To provide measuring indices and indicators,
- To provide coordinated efforts,
- To enable members to interpret goals and achievements of the organization,
- To improve the management practices,
- To improve members morale to provide guidelines which would lead to achievement of the goals.

Why planning?

To establish a number of priorities based on

- Set goals and objectives
- The present situation (SWOT Analysis)
- The trends of the society

- The target group which section

Target □ Scout work with
-Community service

To provide resources in accordance with the objectives
To evaluate achievements on a continuous basis

Planning

Enables organization to:

- To proceed in the right direction
- To ensure that the completion of each stage of the plan of action contributes to the achievement of the objectives which in turn will enable the organization to achieve its set priorities and subsequently its ultimate goals?

Types of plans

Plans can be categorized into three depending on time and ultimate achievement (goals & objectives)

- (i) Short term plan- up to 1 year,
 - Weekly meeting programme
 - Camp Programme
 - Course/training Programme
 - Programme of ceremonies e.g. investitures
 - Outdoor activities programme
- (ii) Medium term plan -1 to 3 years,
 - Progressive scheme of training, to last three months
 - Projects e.g. shelter bridge etc
 - Income generating projects e.g. Bee-keeping, Poultry Keeping
 - Jamboree programme
- (iii) Long term plan -3 to 10 and above years,
 - Community Resource centre
 - Health center
 - Community development projects e.g.
 - Cattle dip for the community

The achievement of the long-term plan is gradual

Factors to consider when planning

- Situation analysis -consider your own situation as a leader, then the situation of the troop and then the environment-
- Internal situation- Consider the strength and weakness in terms of time, resources and external support.
- External situation -opportunities and treats in the surrounding environment in terms of finances, membership, school curriculum, social problems etc
- In your plan, set clear objectives which must be "Smart" short, measurable, achievement, realistic and time bound
- Set priorities in your plan according to importance and urgency
- The systematic approach to planning will help you when making troop programme plan

Qualities of it good programme

1. It must be geared towards achieving the goals of the movement (organization),
2. It must be focus to making someone what you want him to be,
3. It must provide service to the scouts and community at large,
4. It must be applied through scouting method,
5. It must support the achievement of the governments National goals,
6. It must meet the spiritual, social, intellectual, physical and emotional needs of young people.
7. It must provide challenges that are educative, progressive and stimulating,
8. It should be attractive to other youths and therefore increase membership,

9. It should provide personal progress and development,
10. It should be appealing to the public for support and tell its value,
11. It should contain rich activities for a specific age group,
12. It must be simple, practicable and affordable,
13. It must have achievable aim, objectives and flexible

ATroop meeting programme plan

The programme may vary depending on intended purpose (AIMS)

Factors to consider in troop programme

The troop member (C.O.H) should suggest to the scout leader activities they would like to do

2. Activities should include standard and the non-standard work, community service, camp fire and outdoor activities
3. The Scouter should not limit himself only to the badge work
5. The programme should contain a variety and stimulating activities

MODULE 13: COMMUNITY DEVELOPMENT

Objectives:

By the end of this module, the learner should be able to:

- Define community development.
- State ways in which a Scout can participate in community development
- Highlight Scout expectation of the community.

Scouting and Community Development

What is Community Development?

Community development is an educational process of change, based on collective action, taking place within a community and leading to a better quality of life, with the people themselves being the subjects of that process.

In any process there are always steps that lead progressively forward. What distinguishes community development from other approaches is that those steps (from the identification of needs to the final evaluation) are carried out by the people themselves, using primarily the community's own resources.

Ideally, the steps of community development turn into a continuing and dynamic process. Learning from success and failure, small projects progressively lead to more understanding, stronger organization, more efficient planning, more effective action by the community itself and increasing autonomy.

Scouting and Community Development

'Do a good turn every day' by Baden-Powell turned a service to others and later on to community development. Due to the changing needs of the community, our programme has also evolved to accommodate these changing needs of young people.

Young people are part of community and while addressing the needs of emerging issues affecting the young people (HIV/AIDS drug abuse) we end up assisting various communities develop and thus the impact of projects such as putting up a health center, nursery Tertiary Institutions, etc.

Scouting too is an educational process intended to lead a young person from a state of dependence to one of autonomy.

.

In this respect, it shares a common purpose with community development, which, if used correctly, can be a very effective tool for achieving the educational purpose of Scouting.

These two distinct processes are related but by no means identical. Both Scouting and community development are based on a concept of education from within. The person and community play the major role in their own growth, developing their own potentials.

Learning by doing, one of the basic principles of Scouting is also a method used in community development. Decisions are made collectively and responsibilities and tasks are shared amongst small groups in the community.

Voluntary participation is a key element in both. Scouts are volunteers and members of the community make their own individual decision to join in a common effort.

The result, in both cases, is a greater self-reliance as individuals and groups develop an awareness of their needs and take action to meet them, using as far as possible the resources provided by their immediate environment

The similarity of objectives and methods between Scouting and community development, and the fact that Scouts already constitute an organized group of volunteers, places Scouting in a good position to play a significant role in the community development process.

Development Education

What is Development Education?

Development education is the acquisition of ideas, skills and attitudes enabling better understanding of the problems affecting the world today and of mankind's interdependence. These lead us to effective participation in local, national and international communities.

As with all learning, development education enables clearer understanding, accurate decision-making and consequent behavior change. As a result, most people, particularly in industrialized world, should understand their responsibilities towards the planet and its future and be able to express concern by taking appropriate action starting in their own community.

Scouting and Development Education

When development education is correctly introduced into the Scout Programme, it provides an ideal means to strengthen the international dimension of Scouting. In this respect, Scouting shares an objective with development education: to broaden people's horizons beyond their local environment.

Although there is no universal development education curriculum, a properly designed programme incorporating development education will find in the Scout Method a number of elements, which will facilitate the reaching of that objective.

Learning to live in a global society can be effectively enhanced through small group work. Life in the patrol and troop equips the Scout with the skills and attitudes that are necessary for community life.

Opportunities for the sharing of goods, responsibilities and feelings with the immediate group lays the ground for practical understanding of the relationship between rich and poor, of justice and peace, and of sensitivity towards the world and its occupants.

The progressive scheme encourages the young person's skills and consequently his/her ability to perceive and to analyze what is and what should be the state of the world.

Learning by doing can awaken the Scout's curiosity towards life in other places (Through, for example, games simulation exercises, international events). This enables identification of similarities and differences where they exist, and an examination of the reasons for such differences.

Adherence to a moral code, the promise and law, stimulates the Scout's recognition and respect for individuals, peoples, cultures and communities. It may also stimulate interest in the pursuit of just economic, social and ecological Evaluation in examining the extent to which others (either individually or institutionally) observe moral codes in the conduct of their affairs.

The Scout Method emphasizes outdoor activities in contact with nature, which enhances the understanding of the relationship between development and the wise use of natural resources. This, combined with the concept of service to others, reinforces a sense of reality. Critical participation in the world's affairs would be meaningless if only discussed and never lived.

Finally, the fact that, in Scouting, young people from different countries see themselves as members of a world brotherhood provides an ideal basis for development.

Examples of the main areas of Community Development in which Scouts are involved in Africa:

Scouting for Food and Nutrition

In Africa millions of people are faced with food shortages and many go without food every day. As a response Scouts are involved in food production and agriculture. They are involved in growing food crops, e.g. vegetables and fruits. They also keep goats, rabbits, chicken and ducks. Other examples are bee keeping, fish farming, and irrigation of crops, solar food dryers and nutrition education.

Scouting for Health

Availability of health facilities is a major problem in the region, millions lack basic health requirements. Thousands of young people die every year from preventable causes. This heavy toll can be reduced by simple techniques of primary health care. Some of the activities that Scouts are involved in as an attempt to alleviate this problem include: Provision of safe water, sanitation and dispensaries, education of the communities on maternal and child health especially immunization, family life education, drug abuse prevention, HIV I AIDS prevention and primary health in general.

Scouting for Jobs

Unemployment is a major problem facing our people in the region. Thousands of young people are coming out of Tertiary Institution with no employable skills, and hundreds of others drop out of Tertiary Institution each year. Scouting being a prime youth Movement cannot be an observer and hence, it is involved in training programmes, which equip young people with skills. These include vocational training in areas of mechanics, electronic, plumbing, tailoring, carpentry, etc.

Scouting for Nature and Environment

Forests have been continuously destroyed as deserts are spreading. Consequently, this resulted in droughts and famine. Wood, which is basic cooking fuel has become harder and harder to get and more time and energy is spent looking for it. Scouts are concerned by this situation and they are making a contribution. They are involved in prevention of soil erosion reforestation especially tree planting, renewable energies, solar water heaters, cooking stoves and appropriate technologies.

Scouting for Habitat

As the population continues to expand more and more people live in inadequate housing. This problem is especially acute in urban areas where slums have become a common phenomenon. Scouts in Africa are involved in activities aimed at improving human settlement. These include promotion of low cost durable techniques and materials for housing, sanitation facilities, Tertiary Institutions, vocational training workshops, health dispensaries and community centers among others.

Scouting with Young people in Difficult Circumstances

Due to various catastrophes facing Africa like droughts, famine, war disasters and other upheavals, people's lives have been disrupted and others uprooted from their homes. Poverty and suffering has set in. Scout Associations are involved in projects working with street young people, rural and urban poor, refugees and those in urban areas. The projects involve functional literacy, provision of shelter and food, etc.

The Community Expectations of Scouting

Scouting has grown over the years. People expect a good turn from the Scouts/ integrity etc. There is goodwill from the community to support Scouting.

Scouts are supposed to have an impact on the community through their activities such as environmental conservation, clean-up campaigns, garbage collection exercises, wildlife conservation, building of bus shelters, bridges or an important public utility.

The Scouts Expectations of the Community

Scouts expect to get the following from community service:

- Knowledge
- Develop greater self-confidence and a sense of belonging
- Discover their community and the role they can play in improving the quality of life

- Acquire a vision, which extends beyond their immediate environment and community
- Stakeholders of Scouting
- Provide land, a meeting ground, camp, etc.
- Volunteers
- Material and monetary resources
- Recognition and reward

EXERCISE

1. What do you understand by:
 - a. Good turn
 - b. Community Service
 - c. Community Project
2. Write down a community development project proposal.
 - a. Initiate the project
3. What do you think should be the role of Scouting Community Development?

MODULE 14: SCOUT PROGRAMME

Objectives

By the end of this Module the learner should be able to:

Explain the totality of what people do in Scouting, how they do it and why they do it.

Definition of an Educational Proposal

It is a written statement that describes what a National Scout Association commits to offer to young people in the country. In other words it is a re-formulation of Scouting's purpose, principles and method as adapted to the needs and aspirations of the young people of your country.

The Educational Proposal helps introduce the Movement and what it offers young people, parents and the community, and shows clearly the commitment we make towards them.

It also expresses the Movement's goals, so that Educational Objectives can be set. It is called a "proposal" because Scouting being voluntary, a young person joins freely by accepting, voluntarily, this proposal and during the time he/she is in Scouting he/she tries to make this statement become his/her own.

The Educational Proposal encourages adult leaders to offer young people an attractive programme and to commit themselves to a certain style of educational relationship with them.

Elements of an Educational Proposal

An analysis of the main needs and aspirations of young people, as well as the opportunities and threats which confront them in their daily lives Scouting's response: the final educational goals that the Association proposes; the qualities that a young person can be expected to have acquired by the time he or she leaves the Movement

The type of Youth Programme and the services offered by the Association in order to reach these goals; the type of relationship proposed between young people and adults.

Making A Situation Analysis

The National Programme Committee, or a working group appointed by the Executive Committee, should start by analyzing the current situation! in terms of the services the Association provides. A Scout Association cannot hope to attract and keep its members unless it meets their needs. Likewise, it cannot obtain and continue to benefit from the support of its partners (authorities, local communities, etc.), unless it meets at least some of their expectations. It is, therefore necessary to draw up a list of the most important users and partners and identifies the expectations, which will affect the Association's work.

Our first partners are the Young people themselves. As stated in the Constitution of the World Organization

of the Scout Movement, Scouting is: an educational movement for young people. "Young people" means males and females less than 26 years in most countries. In some African countries Youth goes up to 35 years, so the upper limit can be 26 up to 30 years depending on the country considered. The Scout programme is not appropriate after this age. After the needs analysis the committee should consider the opportunities that the Association proposes to young people: Opportunities to express their views and to take part in the decision-making process within the Movement. This takes place first within local units, in an appropriate way for each age: Cub Scouts, Junior Scouts, Venture Scouts and Rovers are encouraged to take on direct responsibility for the running of their team and unit. They participate in the selection, planning, implementation and evaluation of their activities. In this way their interests, needs and aspirations are expressed directly and analyzed. This corresponds to our founder's recommendation "Ask the boy."

Attention should be devoted to how to reach out to other segments of the society, which also need scouting badly: girls, young people in difficult circumstances, rural youth and handicapped.

Parents are also important partners. So whatever we do should be in line with their expectations.

Learners are important partners, chiefly here in Africa where most of our Scouts are in Tertiary Institutions and most of our Scout Leaders are learners.

Religious organizations are also important partners as priests founded most Associations in Africa and they are important sponsors of many Scout groups.

Local and national authorities are partners at all levels. However the independence of the Scout Associations should always be safeguarded. The NSAs as an important part of the youth have a right to receive support from the authorities in their bid to serve their nations.

Business companies and foundations should also be regarded as partners, as they can give the NSAs substantial financial support to reach their educational objectives. Partnership with a successful and popular company, which shares Scouting's values, may make Scouting more attractive to young people and other partners.

Other youth organizations have valuable experience in working with young people. Although they are competitors, establishing partnerships with these organizations will help in sharing knowledge and skills hence, Scouting may be able to play a stronger role in determining youth policies.

Identifying needs and expectations

Two or three members of the committee should be responsible for finding all the relevant statistics and surveys on young people in the country. This will give a clear picture of the number of girls and boys in each age range and the proportion involved in Scouting (penetration rate).

Information of a quantitative nature can be gleaned from available statistics, such as:

- Distribution of young people by the socio-professional categories of their parents
- Tertiary Institution success or failure rate (proportion of young people completing the different Tertiary Institution cycles with or without gaining qualifications, by socio-professional category)
- Main health problems of young people and adolescents (Tertiary Institution health service statistics or Ministry of Health statistics)
- Composition of families: number of young people per family percentage of divorces! Single parent families, etc.
- Percentage of youth members of voluntary organizations: sports clubs, cultural Associations etc.

By incorporating some experts in the committee membership, the committee will be better equipped to make use of these documents and know better their target groups.

Personal Development Areas

Scouting takes all the dimensions of the human personality into account and, therefore, identifies five (5) areas of personal development.

These five dimensions have been presented on the same level as separate areas in order to make them easier to analyze. However, they are in fact all interrelated and form a whole the human personality. They are: Physical, Social, Emotional, Intellectual and Spiritual.

In this Core Programme we have added a sixth area of personal development, "Character", which is regularly referred to by the Founder B-P in his writings.

The six development areas are the target areas of the Youth Programme. All educational experts commonly recognize the first five. However Scout experts, such as B.P himself, added a sixth one, Character Development.

So for us Scouters, human personality is composed of six (6) dimensions (Physical, Intellectual! Emotional, Social, Spiritual and Character.)

In each of these dimensions, Scouting tries to help develop positively the potentials of the young people concerned.

In the Physical Area:

We help each Scout to take responsibility for the healthy growth and functioning of the body.

In the Intellectual Area:

We help develop the capacity to think, innovate plan, execute and evaluate, we help each Scout learn how to get and use information in an original and relevant way.

In the Emotional Area:

We help each Scout recognize his/her own feelings and learn to express them in a manner that will reach and maintain an inner state of freedom equilibrium and maturity.

In the Social Area:

We help each Scout develop a sense of interdependence with others and acquire a capacity to co-operate as well as to lead.

In the Spiritual Area:

We help each Scout discover the spiritual reality that gives sense to life and learn to reflect that reality in daily life. We help each of them develop a better understanding of the spiritual heritage and choice of others.

In the Character Area:

We are helping young people be dependable, co-operative, supportive, patient and tolerant. They learn to count on themselves but also to work with others with a deep sense of solidarity.

Final Educational Objectives

Scouting recognizes and accepts that each person is an individual that is to say unique with different needs, aspirations, capacities, interests and potentials. So our purpose is not to train young people to conform to any pre-set model of an "ideal" citizen but to bring up a happy balanced person, a person who is both autonomous and caring.

Scouting has a clear goal: to help young people develop their full potential so that they can be fulfilled as individuals and contribute towards the development of the society. A National Scout Association presents this goal in its educational proposal, which is based upon an analysis of the needs of young people at a specific time and in a specific socio-cultural context. Its educational objectives are a more concrete and precise expression of this goal. They clearly define, for each area of personal growth, the results which a young person

can be expected to have attained by the time he or she leaves the Movement, having completed the programme of the senior age section (Rovers). These results should be observable by the young person him or herself, by peers and by adult leaders and other people as well. Thus, "Final" means, "should have been reached by the end of the period during which the Scout Movement supports an individual in his or her personal development."

Final Educational Objectives clearly define results to be reached. Doing so they help an Association evaluate whether the educational experience it offers young people is effective or not and to identify how it can be improved.

Once they have been formulated, it is possible to establish related educational objectives for the younger age sections and thus ensure a smooth progression from one section to another.

So step-3 deals with the Final Objectives. They are written statements which describe the final achievements in each of the Six Personal Development Areas (already defined), achievements that each youth member is expected to have made by the time he/she reaches the end of the last section (often called "Rover section"), that means by the time of leaving the Movement. These objectives are called "final" because this is the end of scouting education in the Scout units. However, it is not the end of Education! From this time onward, a Scout is now expected to go out there and make his/her own contribution through other socio- political structures, which determine the destiny of the community, the country and the world.

Final Educational Objectives determine which abilities (knowledge, skills, attitudes) all learners are expected to have acquired by the end of the educational process. Each Final Educational Objective will be declined into several Section Educational Objectives, adapted to the possibilities of each age range. Since Scouting is a Movement of self-education, it is through an on-going dialogue between each young person and the supporting adult that the educational objectives proposed here by the National Association are adapted to suit the particular needs of each individual. They then become personal educational objectives.

Why is it Necessary to Define Final Educational Objectives?

Defining Final Educational Objectives enables us:

- To express Scouting's goal of helping young people to reach their full potential in realistic, measurable terms. What is most important is neither the activity nor the method, but the young person him or herself and his or her development to enable coherent educational objectives to be determined for all age sections (section educational objectives)
- To provide a solid basis for the evaluation of personal progress in all areas of growth
- To gain commitment from adult leaders in the Movement to a common goal

Types of Final Educational Objectives

In each of the six areas of growth (Physical, Intellectual, Emotional, Social, Spiritual and Character), it is necessary to formulate Final Educational Objectives, in accordance with the Association's Educational Proposal, following the three areas of acquisition:

- Knowledge to be acquired (to know);
- Skills to be acquired (to do);
- Attitudes to be developed (to be)

Characteristics of a good Educational Objective

A good educational objective is written in clear, easy-to-understand language and has the following characteristics (S.M.A.R.T):

Specific (S)- it deals with only one Module and is expressed in clear, precise terms

Measurable (M)- it is expressed in terms of observable behavior

Achievable (A)- it corresponds to the capabilities of the young people concerned and can be achieved under the existing conditions (time, resources)

Realistic (R)- it corresponds to the identified needs of young people

Time bound (T)- a time limit has been set.

Setting up Educational Objectives

There are several steps to follow:

- Identifying priority areas
- Considering the needs of all girls and boys
- Drafting objectives

EXERCISE

- List educational objectives in your National Scout Association for Cub Section
- What is an Educational Proposal?
- Briefly describe the six dimensions that are addressed in an educational proposal.
